### THIRTEENTH YEAR.

## ON NEW YORK'S THRESHOLD.

### SEVERAL EXPECTED SHIPS IN NEW YORK BAY.

All Attention is Now Directed to the American Tugs - The Timosey Prescotts - Several Deaths Yesterday Among the Passengers.

New York, Sept. 4.—Two more cholera victims, it is believed, have reached the harbor. They are the Regia and the Normanna, both from Hamburg. The Regia lost four persons and the Normanna five by death on the voyage. Besides, four stowaway passengers on the Normanna died of cholera. On August 29, the Regia was quarantined at the foot of the East River. The other steamer was not quarantined. Both vessels, like the Moravia, belong to the Hamburg-American Line, and like her had clean bills of health.

The Regia, on the older boats of the line, sailed from Hamburg on Aug. 21, stopping at Havre two days later. She was in command of Captain Lindner and carried 100 passengers. The Regia was quarantined at the foot of the East River on August 29. The other steamer was not quarantined. Both vessels, like the Moravia, belong to the Hamburg-American Line, and like her had clean bills of health.

The Normanna, which is comparatively new boat and one of the latest of the line, sailed from Hamburg on Friday, Aug. 26, and from Southampton the next day. She almost overtook the Regia. The Normanna was quarantined at the foot of the East River on August 29. The other steamer was not quarantined. Both vessels, like the Moravia, belong to the Hamburg-American Line, and like her had clean bills of health.

The quarantine tug alongside the Regia noted a signal for the first time. The steamer to stop, but the Normanna kept on. She came to anchor at upper quarantine at 5:40 o'clock. The big anchor was made, and the tug alongside. The Regia was ordered to go back to the lower bay. The Regia was ordered to go back to the lower bay. The Regia was ordered to go back to the lower bay.

## EXPLOSION AT GREENOCK.

### A Bark Laden With Gunpowder Blown Up.

GREENOCK, Sept. 3.—The people of this city and its neighborhood were startled this morning by a deafening roar that was subsequently ascertained to have been caused by a powder explosion. The new bark Achonach, with 20 tons of gunpowder on board, had been lying at anchor in the harbor of Clyde, off Greenock. Those persons who happened to be looking in the direction of the bark saw a bright flash of light, which was followed by a deafening roar that shook the earth. Then a dense smoke arose and in a few moments the bark was a mass of flames and debris. Her gunpowder hatches and deckhouses were blown to an immense height, while her masts were broken off, falling alongside the wreck. The topgallant foremast was blown out and the whole forward part of the vessel was sent to pieces. Aft the water line the planking was blown out, leaving huge holes, while below many of the butts were started, and the water poured in. The bark was completely wrecked. It is believed that the explosion was caused by the carelessness of the crew.

The explosion was caused by the carelessness of the crew. The crew was negligent and the company's rules were violated. The explosion was caused by the carelessness of the crew. The crew was negligent and the company's rules were violated.

### AN OPINION THAT SHE IS NOT OF SOUND MIND.

A Doctor Who Says That The Bodies Were Warm When He Saw Them—Expert Detectives—Borough on the Case—The Dress Pattern Produced in Court Is Not Believed to Be the One She Bought. Boston, Sept. 3.—A Fall River special to the Globe says that one of the prosecuting officers in the Borden case stated to the correspondent, on condition that his name should be withheld from publication, that he had frequently talked with Lizzie Borden and had watched her closely, and had noticed that her eyes were very unnatural and the way she talked was indicative of that of a person mentally deranged. The speaker said he had had a long conversation with her, and that she seemed to be of a sane mind, but that he was not a doctor and considered himself unqualified to judge of a case of mental irregularity. As firmly as he believed the opinion of the doctor, he would not say that he thought it the work of one insane. After she had been looked up a few weeks he shall look for a mental collapse and more definite signs of her trouble. Should his predictions come true on the examination of two doctors, it would be a strong argument for her removal to an insane hospital, and that would end the prosecution of the Borden murder case.

The Bodies Were Warm. LONDON, Sept. 3.—Dr. John H. Alcock, of the Royal Free Hospital, has given his opinion on the condition of the bodies of Mr. and Mrs. Borden before he went west, but as he went away before any suspicion was directed towards the bodies, he is of the opinion that the bodies were warm. Now he says he saw the bodies a short time after they were discovered by the daughter and viewed by the police. He is of the opinion that one had been dead over an hour before the bodies were discovered. Mr. Borden was killed first and Mrs. Borden was followed up by the murderer. The bodies were found in a room, and the window was closed for assistance.
