

Cream Separator Savings

AN IHC cream separator saves money for you in more ways than most people know. It saves cream because it skims practically all the butter fat out of the milk. It saves on the feed bills. Calves and pigs thrive on the sweet, warm skim milk that comes fresh from the separator. It saves fertility. The dairyman who feeds the skim milk to animals parts with a very small amount of fertility. The man who sells whole milk loses close to \$4.80 per cow per year in fertilizing matter. These three savings, while not all that a cream separator makes, are important enough to warrant the most thoughtful consideration.

IHC Cream Separators Dairymaid and Bluebell

are also furnished as complete power outfits, as illustrated above. The engine is a one-horse power, back geared, hopper-cooled, IHC engine which can be detached and used to run any small machine. The separators are built for long life and skimming efficiency. They have heavy phosphor bronze bushings for bearings; a never-failing splash oiling system; trouble proof bowl spindle bearings; dirt and milk proof spiral gears which are easily accessible for cleaning. There are four convenient sizes of each style. Ask the IHC local agents who handle these machines for demonstration. Get a catalogue and full information from them, or, write the nearest branch house.

Fruit Growing in Quebec

By the President of L'Islet Horticultural Society

FRUIT growing is extending rapidly in the province of Quebec. There are many reasons for this, one of the principal ones being the splendid work that is being accomplished by our numerous fruit experiment stations. These are strategically located in various counties of the province.

The stations in operation this year are as follows, the name of the manager being given in each case:

Village des Aulnaies, L'Islet Co., Auguste Dupuis, manager; Rimouski, Rimouski Co., Rev. Fr. Henri; Caplin, Bonaventure Co., J. T. Bujold; Mansseau, Nicolet Co., Alcide Savoie; Gaspé Basin, Gaspé Co., Wm. H. Clark; Isle-Verte, Temiscouata Co., J. T. Bertrand; Notre-Dame de Lac, Temiscouata Co., Napoleon Morneau; Roberval, Lac St. Jean, Ursuline Convent; Ste. Henedine, Dorchester Co., Mr. N. Roy; Saint-Damien, Bellechase Co., St. Ignace de Loyola; Sainte-Famille, Montmorency Co., F. X. Gosselin; Charlebourg, Quebec Co., Etienne Paradis; Pleisisville, Megantic Co., George Savoie; Sainte-Adele, Terrebonne Co., Dr. W. Grignon; St. Theodore d'Acton, Bago Co., Auguste Lacoste; Beauceville, Beauce Co., Fr. Mariste; Saint-Pierre, Montmagny Co., J. Delagrave; Chateau-Richer, Montmorency Co., Jos. Cloutier; Saint-Germain, Kamouraska Co., Pierre Tardif; Saint-Leon, Maskinonge Co., Horm. Paquin; Victoriaville, Arthabaska Co., F. L'Abbe; Grand Mere, Champlain Co., Georges Chahoon; Rectory Hill, Megantic Co., Rev. Mr. Dickson; Shawbridge, Terrebonne Co., Boys' Industrial School; Saint-Anselme, Dorchester Co., Auguste Lavallee; Saint-Georges, Beauce Co., Louis Gendreau; St. Sylvestre, Lotbiniere Co., Louis Prieur; La Trappe, Two Mountains Co., Br. Leopold; Ste. Anne, Chateaufort Co., Thom. Will. Tremblay.

Then also there is the Village des Aulnaies Nurseries and Fruit Garden, established in 1860 by Aug. Dupuis, M.C.A. proprietor, Albert D. Verreault, Village des Aulnaies, Que.

Here were imported trees from Ontario, the United States, and France. The fruit that survived the severe winters were multiplied, and are now cultivated all through the north-east part of the province. Messrs. Chas. Arnold and Beadle, of Ontario, guided the first experiments, and now Mr. Beadle's successors, of The Canadian Horticulturist, continue to guide us in modern fruit culture, and we take pleasure in acknowledging it.

Mr. J. E. Caron, Minister of Agriculture, is also helping the industry, which has made great progress in the last few years in north-eastern Quebec. Twenty-four demonstration orchards in L'Islet and Kamouraska counties are in operation. Spraying and pruning demonstrations were made last year in over four hundred orchards in these two counties by government experts and explanations given each operation.

Two fruit cooperative associations, one at St. Anne Lapocatiere, with a cannery factory, and one at St. Valier, are giving satisfaction to the fruit growers. Ten thousand quart and gallon cans of preserved plums were sold at the St. Anne factory to the Canadian Pacific Railway Co. last winter. Car loads of Damson and Reine Claude plums were sold at Montmagny in refrigerator cars by the cooperative society last fall. These sales have created enthusiasm in plum culture, and numerous
