

The following is the result of the election :—

President—Raoul Beaulieu.

1st Vice-President—Willie Murphy.

2nd Vice-President—Omer Allard.

Secretary—Walter Brophy.

Treasurer—Fred Lamoureux.

Councillors—Wm. Weir, Henri Christin, Gregorio Flores.

The above committee is certainly one of the best that could have been chosen, and it is quite safe to predict that the success of the games is ensured.

Scarcely had the boarders time to unpack their trunks and locate themselves in their various positions in the study-hall, when a challenge to a friendly game of football was received from the externs. It was duly accepted, and on Tuesday, Sept. 9th, the two teams lined up as follows :—

SOCIETIES.

This column of THE OWL is to be devoted to the interests of the several societies of the University. It will be our endeavor to make it as interesting as possible to every reader who has ever been a student in this or any similar institution. We are sure that there are few recollections which an alumnus of Ottawa can entertain, more

pleasant than his participation in the College societies. For there it was that he received the distinctions within the gift of his fellow students, which, trivial as they may seem to him when now engaged in the greater struggle for the honors of the outside world, were, then, matters of absorbing interest, and to the recipient, a source of honest pride.

Foremost in good results are the Debating Societies, of which there are three, the Seniors, Juniors and French. The work accomplished by them, especially by the Senior, for nine years under the management of its popular director, Rev. Fr. Nolin, may well be boasted by the students, for the eloquence which now moves many a congregation and audience in both Canada and the United States, was acquired here. The Junior Society is preparatory for the Senior, and the French has for object the improvement of our Canadian friends in the knowledge of their own language.

The Reading Room Association gives us the opportunity of keeping up with the current topics of the day. The principal English and French news, literary, and scientific papers of Canada and the United States are on file in its hall.

The Scientific Society encourages all possible research into the mysteries of physics, astronomy, geology, mineralogy and chemistry. It is an invaluable ally of the classes in which these branches are taught.

One of the youngest of our societies is the Cecilian, which promises for the near future. It controls the University Brass Band, an organization which will stand comparison with that of any college.

The ascent from the literary, scientific, and musical to the moral culture is easy. The last mentioned is found in our sodality of the Blessed Virgin, an organization which has for years helped to maintain the high moral standard of Ottawa University.

The younger students, emulous of their elders, have also a similar society, that of the Guardian Angels.
