MALTINE..
with **Creosote**

SOME years ago, when the value of Creosote became fully demonstrated, we began the publication of a formula for the administration of Creosote in Maltine. This formula has been employed successfully by thousands of physicians, and we have been urged to place such a combination upon the market, in order that a uniform and properly prepared product should be available under all circumstances.

“MALTINE with CREOSOTE”

is the most eligible and palatable form in which Creosote can be administered. The vehicle—Maltine Plain—is particularly indicated, by reason of its great food and digestive value, in all conditions in which Creosote is so universally employed.

It will give us pleasure to send sample of this preparation to any physician who wishes to satisfy himself of its therapeutic value.
