### ABDOMINAL APPLICATIONS IN TYPHOID FEVER.

Success in handling a case of typhoid fever may be likened unto the steering of a ship, already in distress, through a dangerous rocky channel. Results depend upon the man whose hand is on the wheel. Lucky be the typhoid fever patient in the hands of a cool, commonsense doctor. It is this sort of a physician who guides his patient through the tortuous, rocky channel of typhoid fever and finally brings him into a safe port.

The many-sidedness of typhoid fever gives it a large interest and calls for good judgment. What to do and when to do it, are questions largely determining a physician's success in this infection. The bowels are inflamed, the Peyer's patches being the foci of inflammation, and it is but the application of commonsense principles to seek for some means of combatting this intestinal inflammation.

Local application prove efficacious elsewhere in inflammation—why not here? Applications with hygroscopic properties reduce inflammations in other tissues of the body and will do likewise in typhoid fever. The best of these is Antiphlogistine and its use in typhoid fever is demonstrable. It will tend to reduce the inflammation and thus contribute in making the typhoid patient comfortable and assist him in his return to health.

Antiphlogistine is applied over the abdomen to the thickness of an eighth of an inch and then covered with a suitable soft cloth. This is renewed twice daily.

This use of Antiphlogistine is a valuable adjunct in the usual treatment of typhoid fever and is of distinct assistance.—*Medical Era*.

### "BARLEX."

This is a very carefully prepared malt extract, and is made from the best barley, by a special process which preserves the albuminoids, phosphates, maltose, and diastase. It has given excellent satisfaction as a nutrient. It has also been combined with cod liver oil in the form of an agreeable emulsion. The oil used is guaranteed to be the best Norwegian. The preparations of "Barlex" and 'Barlex' with cod liver oil are manufactured by Messrs. Holden and Company, of Montreal, whose reputation for making a good article stands very high.
