JOHNSTON'S FLUID BEEF

has been pronounced by leading scientists and physicians everywhere to be the most perfect form of concentrating nourishment at present known. It is rapidly superseding Tea and Coffee in the colder European countries, and is served hot on draught in the fashionable Saloons and Restaurants. As a Winter Beverage it is simply perfection, supplying heat in its natural state; stimulant in a thoroughly innocuous form; concentrated nourishment, rendering languid reaction impossible; and, above all, furnishing tone to the nerves, and substantial food for brain, bone and muscle.

VELOCIPED SLEIGH.

The engraving shows an improved velocipede sleigh recently patented by Mr. James B. Bray, of Waverly, N. Y. The apparatus is to be ridden and propelled in a manner similar to that of the velocipede or bicycle. The backbone is supported by two pairs of runners, the front pair being swiveled. The propelling wheel is mounted in a forked frame swiveled in the backbone or main frame, and provided with spurs projecting from its periphery.

BRAY'S VELOCIPED SLEIGH.

The outer ends of the crank shaft are connected with the front runners, so that when the wheel is turned for steering, the front runners will turn in the same direction.

Every effort will be made to render the publication a useful vehicle for the conveying of information respecting the latest progress in Science and the Arts.
