(Concluded on next page.)

**To Architects and Plumbers.**

**THE EUREKA FRESH-AIR INLET VALVE.**

The accompanying cut represents a fresh-air inlet, the object of which is to prevent the escape of sewer gas and also ventilate the drain. The rubber ball is suspended from the top of the chamber with a brass chain. A slight back pressure of air forces the ball against the iron seat formed in the chamber. It has been tested and found to act well.

Where the ordinary vent cap or goose neck is used, there is nothing to prevent the outflow of sewer gas.

**A COMPLETE ASSORTMENT OF PLUMBERS' SUPPLIES ALWAYS ON HAND.**

FOR PRICES AND TERMS APPLY TO

**W. B. MALCOLM,**

(Manufacturer and Patentee)

89 and 91 Church Street,

TORONTO.
