### New Reference Publications

The Institute has recently published a new bibliography, edited by Ron Purver, Senior Research Fellow, *Surviving the Nuclear Age: A Bibliography on Nuclear Weapons, Arms Control and Disarmament, 1987 Update*. The print version of this comprehensive English-language bibliography is available for the 1987 update only, although the core bibliography and updates cover materials from 1945 to the present. Access to these is available directly from the library.

Coming in June are two further publications, *Canada and International Peace and Security : A Bibliography, 1985-1989, and the Peace and Security Thesaurus*. The former compiles material from the library's database covering the serial literature, ephemeral literature, and some government documents containing the Canadian perspective on issues of international peace and security. It will be published annually.

The thesaurus is a listing of subject terminology in the field of peace and security. We hope it will prove useful as a basis for libraries and other information centres looking for a standardized vocabulary to use in providing subject access to their collections.
