SOURCES:

Cols. 1, 2 and 3—D.B.S. Trusteed Pension Plans (see Note a)

Col. 5 "Assets" (see Note d)—Budget Papers; "Contributions"—National Accounts.

(a) Included are the provincial civil service plans for only three provinces and teachers plans for only seven provinces.

(b) Plans written on a pension trust basis are not included. Contributions to such plans amounted to an estimated \$30 million in 1962.

(c) Estimate later indicated to be about 20% too large.

(d) Government liability at March 31 of following year. These figures include the unamortized portions of actuarial deficiencies in the government funds, i.e., those amounts which had not been written off to budgetary expenditure. At March 31, 1963, the deficiency not written off amounted to \$806 million. Large increases from preceding year usually reflect the result of an actuarial valuation.
