REMARKS REGARDING ABOVE

WITH COUNTER REMARKS

1. Under each of these general headings of By-Laws there should be stated all that pertains to the subject which it is necessary to mention - e.g. Composition (number of persons and their qualifications), Election or formation etc.

Counter remark

That has been our aim in the draft submitted

2. Under Membership it should be made clear that there can be members of Local Committees and Provincial Branches only - that is there can be no members in any Province or locality who are not in the first instance members locally and their fees or contributions no matter to whom sent, must go to the local organization, if such there be, and where there is no local organization, such member, or members should be asked to constitute such.

Counter remark

We interpret that to mean, that no person may contribute membership fees to a Branch outside of the Province in which they reside, but must have their membership transferred if moving from one Province to another - ?

3. There should be provision made also for "Contributors" who may not desire membership as such.

Counter remark

The point is not clear to us.

While that may present itself to some minds as the initial stage of organization, as the "beginning" and the "beginning" in the mind of the public, the birth of the organization or the system of local Headquarters, will be proper.
