

We Make Shoes For Log-drivers and Land-Lookers.

AMAZON RIVER SHOE

An experience of thirty years and a first hand knowledge of the hard service such shoes must sustain, has taught us how to make footwear for operative lumbermen that is practical, strong, comfortable and durable.

The shoe here represented is our Amazon. It is made from eight to eighteen inches in height, is built throughout of the very best material and will hold calks.

For Land-lookers we manufacture a line of light-soled high cut shoes that lessen the fatigue and stand the strain incident to hard walking over rough country.

Our catalogue contains descriptions, prices and full particulars regarding our product. Sent on application.
