Veto Bill Discussed in the Upper House and Passes First Reading-Preparations Still Going on for General Election-Radicals Suspicious of Titled Legislators.

LONDON, Nov. 16 .- Pending Premier Asquith's official statement before parliament on Friday, small hope is entertained of clearing up the involved situation, which has now resulted from the sudden change introduced by Lord Lansdowne's call for the veto bill. The feature which stands out in the present position of the parties is that the house of lords finally has awakened to the absolute necessity of undertaking self-reform. The Radical leaders view this late repentance with the utmost suspicion, and it remains to be seen whether it will eventuate in an agreement, which the abortive veto conference failed to

The parliamentary lobbies to-day were full of rumors of all kinds—that the King has refused to give the prime minister guarantees to increase the number of peers sufficient for the government's purposes in referming the enment's purposes in reforming the house of lords; that the ministry would resign; that another party conference

A CHECKMATE.

LONDON, Nov. 16 .- (C.A.P. Cable.)-Yesterday Lord Lansdowne called a check to the government; to-day the government got out of the difficulty and replied with a checkmate. In the house of lords Lord Crewe, responding to Lansdowne's polite demand for the parliament bill, promised it on "take it or leave it" terms. The government were "willing and anxious to put the bill down for discussion, but we are not prepared to accept any amenda

Events of 1907-8 and the Moral — The Farmer Has All Along Been the Chief One to Gain By the Country's Great Protective Policy.

(Tenth Article).

Could anything more conspicuously exemplify the solid basis of our commercial prosperity than the ease with which Canada passed thru the trade depression that reached its depth in the winter of 1907, and the spring of 1908, especially, when contrasted with experience in the United States?

Industrial stagnation was then almost world-wide, but not more severely felt anywhere than in the republic to the south of us. Canada from her contiguity to and extensive financial and commercial relationship with the United States offered susceptibility to the reflex influences consequent on the reflex influences consequent on western hemisphere monetary disturbances. But the there was a brief appreciable financial strikency in Canada the situation did not develop a really serious aspect, while our recovery followed with remarkable rapidity.

really serious aspect, ery foliowed with remarkable rapidity. No better proof can be given of the sufficiency of our national commercial and banking fabric and its internal security. Common sense invites the conclusion that the policy which has assured so marked a reserve of native strength must have been of the highest public advantage and must be upheld in the public interest. No less does it justify the contention that those who are concerned in the attempt to alter the national policy and to replace it by a system designedly calculated to make Canada an integral part of the United States' financial system, are, whether

Protect the Farmer. The same agencies that are working against adherence to the national policy of practical protection make it part of their game to play the agricultural against the manufacturing indussion of these markets depends on the success and enlargement of the indus-
