A FARM HOLIDAY.

The 24th of May is the farm holiray for Cacara. The spring seeding The day is a part of the lives of every farmer, and the very existgood. A good time of healthful sport, taken from the routine farm work, comes as the best of tonics to tine rural pleasantries of Ontario. Enjoy the day. Be as enthusiastic in the fur as in the work. A namby-pamby funster is as detestable as a lazy, half-hearted worker on the farm, and he's an abomination.

HAY IS POOR.

The continued cold weather has made most of the old meadows of Ontario, east of Toronto and in the central dale standard. west, look extremely hard. A large hay crop is out of the question, with most favorable weather hereafter. New seeds are badly killed all over the Clydesdale Horse Association of Can-province. A cattle dealer from Cay- ada be amended to read: uga, on Lake Erie, says that the out-lock even there is poor and the crops of hay will be away below the average.

Navigable Canals.

Germany is engaged in promoting, among other canal schemes, an en-terprise of gigantic proportions in the way of internal havigation. A scheme has been drawn up in detail for the uniting of the rivers Moselle and the Saar by means of a navigable canal. Prussia, Alsace-Lorraine, the Lower Rhine province, and Luxemburg would each contribute proportionately to the cost of the undertaking. A juridicotechnical commission is now engaged in studying the project in all dis bearngs, whether of practical engineering, administration and tollis and State and international law.

WATER-POWER IN SWEDEN. Famous Falls to Be Used to Run the Railroads.

In Sweden the government has become very much interested in the numerous waterpowers which have made that country famous, but not for the purpose of preserving them as show places, but, rather, in order to ensure economical sources of power for all time for the state railways. Recently some six or eight of the most famous waterfalls have been ac-

quired by the government.

The plan is to electrify all the state railroads. Already high voltage single-phase electric traction has been in-stalled on a large scale on the main lines. Hydraulic power plans furnish ideal sources of energy for such roads, Members of Union No. 108 Are Talk- and have the advantage of being avail-ing of Farm Telephones. able for practically all time.
