#### CANADIAN LAMB CHOPS FOR NEW

We give full support to the measure now submitted to the province. We approve of its prohibitive and restrictive features. We accept the terms under which it is referred to YORK. We all remember the story of the maelstrom which sucked into its watery the electors for their approval. depths anything and everything that assent to the government's demand came within its outer swirl. The New for a decisive popular vote in its favor as a condition of its becoming York Stock Exchange is very much the law. We give this measure unhesitating and hearty approval, because if carried it will close every barsame kind of a wrecking institution. It is becoming more and more a highly room and will have behind it a body of public opinion which cannot be disregarded or terrified or turn-ed aside. Still further, we comorganized institution, backed with immense money, and having for its express object the drawing to New York of great stores of money, under the premend this course to every one who cares at all for the progress of the virtue of temperance, not because this is the best or the last method of dealing with an accursed traffic tence of investment, but which is really put into gambling-put into a game where the outsider is eventually bound to be shorn. People in Canada who put and an increasing social evil, but because if carried the act can be enforced, and if not carried the way their money in the New York stock market are taking more risk with less will be open for action along so chances of making money than in any other line, and the vote for pro-hibition under the referendum will be the vantage ground for future action and will be accepted as the measure of the province's interest other investment we know of. The head manipulators in New York work everything so as to create a boom; when the boom is on and stocks begin to rise they in any progressive temperance movement. Every vote for this act under such conditions will count ask the public of outside cities to come; the public in the outside cities come in on margin, and for a while they appear for temperance reform, and the vote of every friend of temperance to be making money. Then, all of a in Ontario should be counted. sudden, money becomes tight, stocks go down, the "short" interest gets to work and the outsider is asked for more margin, and when this is exhausted he is given a final squeeze and put down given a final squeeze and put down without a dollar. When this happens, in each trade and business make it Methodist Church will organize a so-

The constantly increasing knowledge without a dollar. When this happens, the New York brokers put it all down to the banks and the stringency of money, but whatever it is, the outside investor, or rather speculator, always seems to get the worst of it. Very rarely does the money ever come back to the outsider. Every now and then somebody does make a haul which he may lose in a subsequent venture. But the point we wish to bring home to the ordinary individual is, that if he goes into buying stocks on margin he is un against a great big heartless combination in New York that treats him as a lamb to be fleeced, and, accordingly, fleeces him nearly every time. In other words, he is in a game where he has no chance, and especially have he and the corresponding branching out in each trade and business make it more imperative each day that a man business that a man to offine his attention not only to one business but to one branch of that business. In order to succeed he must make a specialty of some line of work. The Imperial Life Assurance Company of Canada, head office, Toronto, makes a specialty of glving its policy-holders the very best life insurance, i.e., undentified by business which it does and against a great big heartless combination in New York that treats him as a lamb to be fleeced, and, accordingly, fleeces him nearly every time. In other words, he is in a game where he has no chance, and especially have he and life.

he can only make money out of the outsider by absorbing his margins. Every village, town and city in Canada has within the past few days poured a stream of gold into New York for which they are getting back not one cent, and this same stream is flowing thitherward from almost every place in the United States. New York is getting to be a great city, an enormous city, a city full of very wealthy men, and a great many of these wealthy men, or it they are not wealthy they are high tollers, are having a fine time on this stream of gold which the investivation.

rollers, are having a fine time on this stream of gold which the investing, or, rather, the gambling, public all over the continent are good enough to send them.

A couple of city papers have been "barking" daily in special articles for the New York show, and they must feel proud of the way they have helped to make the New York wolf richer at the expense of the Canadian lamb.

Ask For Canadian Brown this stream of the canadian Properties of the Cana

make the New York wolf richer at the expense of the Canadian lamb.

ASK FOR CANADIAN GOODS.

The Canadian Preference League movement deserves support from every Canadian. If the average citizen and his wife and children can be gotten into the habit of preferring home-made to foreign-imade articles a decided impetus will be lent the trade of our own country. The home consumption of Canadian goods will be vastly enlarged, Toronto, Montreal and other Canadian manufacturers will have to callarge their plants and increase their output, employment will be given an upward boost, and millions of money that we now pay over to the United States and other foreign manufacturers will have to enlarge their plants and increase and increased number of artisans, the wages of workingmen will be given an upward boost, and millions of money that we now pay over to the United States and other foreign manufacturers will expense to our own country of the general adoption by the individual Canadian enterprises. In fact it is difficult to over-estimate the far-reaching importance to our own country of the general adoption by the individual Canadian will not only benefit the manufacturers and the country, but they will at the same time be directly benefiting themselves.

Patriotic Canadians—Canadians who have the finterests of Canadian and the dountry, but they will at the same time be directly benefiting themselves.

Patriotic Canadians—Canadians who have the finterests of Canadian who have the finterest at heart—will therefore when the finterest at heart—

manufacturers and the country, but they will at the same time be directly benefiting themselves.

Patriotic Canadians—Canadians who have the interests of Canada and their own interest at heart—will therefore prefer Canadian goods in every case in, which such goods equal in quality and do not exceed in price the corresponding foreign product.

So, when you go out shopping ask your merchant for the Canadian-made article, and, if he does not keep it in stock, insist that he procure it for you!

SPECIALISTS IN BEGGING.

This age of specialization has developed a new vocation across the line. Two young Philadelphians are said to make \$3000 a year aplece as professional beggars. When they find that an institution or a benevolent gociety is in need of a few hundreds or thousands pf dollars, they offer to raise the money required on a commission basis, their fees truining from to to thirty per cent of the sum to be collected. When they undertake a particular job, they familiarize themselves with the most convincing arguments available in each case. Being experts at the work, they no doubt succeed admirably, that is, if anything about the most efficient and more of catarrh. The same of stuarts of the undertake and manufacturers and the succession of the sum to be collected. When they undertake a particular job, they familiarize themselves with the most convincing arguments available in each case. Being experts at the work, they no doubt succeed admirably, that is, if anything about the convergence is succeeding to the manufacture with doubt and week the convergence is succeeding the convergence is succeeding to the convergence is succeeding to the convergence is succeeding to the convergence is succeeding the convergence is succeeding to the convergence i
