## RIGH TARIFF ON DATS

Canadian Mills Have all Closed Down For Want of a Re-Adjustment of the Tariff.

The failure of the oat crop in Canada last year, and the disparity between the American and Canadian prices of this cereal, has brought about stagnation in the oatmeal milling business of Canada, so that to-day there is not a mill in operation in the country. Until quite recently the 'arge cereal works at Peterboro, which are largely controlled by American capital, tried to keep their mills running under those provisions of the Dominion government which allow them to manufacture in bond, but the freight rates were found to so discriminate against the Canadian manufacturer that the mills in Chicago and Grand Rapids could manufacture and ship to foreign countries at a cheaper price than those which partly used Canadian railroads. A little misunderstanding arose between the government and the manufacturers in regard to bonding it in and bonding it out, but this had nothing to do with the mills shutting down. About one-third of the product disappears in evaporation during the course of manufacture, and the government officials were at a loss to account for the bulk of pats which the company brought in.

Principle Reversed.

The general principle of the National

The general principle of the National Policy is that the raw product shall be admitted at a less rate of duty than the manufactured article; but in the manufacture of oatmeal this principle is reversed. The duty on American oats is 10 cents per bushel. It takes about twelve bushels to produce 200 pounds of oatmeal (equal to one barrel). At ten cents per bushel duty on oats, the Canadian manufacturer pays about \$1.20 on every barrel he manufactures. But the duty on a barrel of oatmeal from the United States is only from 60c to 70c per barrel, or about half that which the Canadian manufacturer has to pay on the raw product, oats.

uct, oats.
The Canadian manufacturer would be on equal footing with his American cousin if the price of oats were inc same in the two countries. But 'hey are hot. The Canadian farmer is ie farmer, plus the duty, 10c. In carload lots yesterday at Buffalo oats were selling at from 34c to 35c, while in Toronto they were selling at 44c to 35c, and 48c from the farmer's wagon.

Shackles the Manufacturer.

Shackles the Manufacturer.

At such prices the manufacture of oatmeal is out of the question. The miller here is handicapped to the extent of \$1.20 per barrel, if he buys Canadian oats. If he imports oats from the United States and pays the dury, he is at the same disadvantage. The Americal miller shipping into Canada is under no such penalty. He pays a duty of about 60 cents per barrel, and can thus undersell the Canadian manufacturer in his own country.

This condition of affairs can only last so long as there is a scarcity of oats in this country. The oatmeal milling year runs from September until September, and if the Canadian crop is a good one this year, prices

crop is a good one this year, prices will conform nearly to those in the United States, and the mills will no doubt begin operations again. Should this condition of affairs last for two or three years it would mean death to the astmest husiness in Cantella. to the oatmeal business in Canada, as the mills would discontinue to manife facture altogether. Have Asked Redress. The oatmeal millers have frequently

made claims on the Dominion government to a revision of the tariff. What they ask for is a specific duty of 60c per 100 pounds. This would place the Canadian manufacturer on about the same footing as his American rival, taking the disparity of prices of the raw materials into consideration. The duty would then be the same on oatmeal as it is on oats. It is this disparity and the short crop in Canada parity and the short crop in Canada last year that has brought about the cessation of the oatmeal milling busi-ness this side of the line. s estimated that, owing to the fail ure in the oat crop last year, our ex-ports of oats fell off \$1,029,429.

Satisfied With His Employers. A Philadelphia clergyman, visiting an old schoolmate in Montana, was called upon to speak during revival services in a large camp of Swedish

Looking straight at a powerful-look ing man who sat in front of him, the minister asked: "My friend, don't you want to work Swede thought a few seconds and replied slowly:

### TAKE MY CURE, WHEN CURED YOU PAY ME

cure you, nor will these maladies cure themselves. When I offer you a cure, and am willing torisk my professional reputation in curing you, and have such faith and confidence in my continued success in treating these diseases that not a dollarneed be paid until you are cured, a fairer proposition cannot be offered to the sick and afflicted. This should convince the skeptical that I man what I say, and do exactly as I advertise, as I am positive of curing you in the shortest possible time, without injurious sitereffects. My charges will be as low as possible, for conscientious, skilful and successful services, and my guarantee is simple and true. Not a dollar need be paid until cured. I have 14 diplomas and certificates from the various colleges and state boards of medical examiners, which should be sufficient guarantee of my standing and shilittes. It makes 10 difference who has failed to cure you, it will be to your advantage to write to me for my opinion of your case, which I give you free of charge. I want to hear from patients who have been unable to get cured, as I guarantee a positive cure for all chronic, nervous, blood and skin diseases, which I accept for treatment. I not only cure the condition Itself, but likewise all the complications, such as rheumatism, kidney and bladder troubles, blood poison, physical and nervous debility, lack of vitality, stomach troubles, etc. All medicines for patients are prepared in my own laboratory tomeet the requirements of each individual case. All medicines for Canadian patients sent from Windsor. Ont., duty and transportation prepaid. I will send a bookleton the subject which contains the 1d diplomae and certificates, entirely free. Address simply. free. Address simply.

# GUBA---THE LAND OF SUNSHINE

**CANADA-CUBA LAND AND FRUIT COMPANY, LIMITED** 

"THE ONTARIO COMPANIES ACT."

REMEMBER, all Fruit Lands Must be of a SANDY LOAM SOIL—Practical Experience Teaches This. Second Issue of Ten Thousand Acres Only Will Be Sold at \$20.00 an Acre

After this is sold a further issue will be sold at \$40.00 per acre. Buy Now and Save Money. You can't duplicate this land for less than \$50.00 per acre to-day in Cuba. Buy a business lot at \$50 to \$75 which will rapidly increase in value. Terms cash; or 25 per cent. cash and 25 per cent. each month till paid for.

WINTER RESORT

Cuba will be a favorite winter resort for the people of North America, because of its favorable location and uniform temperature. At the time when the Northern States are clothed with snow and ice this island has the climate of June. With its fine sandy beach for bathing, its land-locked harbor for yachting, the rolling lands in the background for beautiful scenery, and Canadian people for neighbors, Ocean Beach should be the most desirable as a winter resort. The scenery on Guadiana Bay is grand and inspiring. Our estate is covered with tropical foliage. The water is so clear that the gravely bed from ten to twenty feet below can be seen distinctly, abounding in certain sections with Spanish mackerel, a species larger than the mackerel of our Northern markets and fully as palatable.

Purpose of the Company

Since Cuba obtained its independence, and since its favorable climate and fertile soil have become known, there is a growing demand among the people from "The States and Canada" for real estate holdings in this island. Naturally the desire is to be located among the Canadian people, and to know that titles are clear and valid. As the company's property is especially adapted for the es-tablishing of a colony, and as it contains more acreage than the company could put under cultivation in many years, we have concluded to offer for saie fifty thousand acres of land divided into ren-acre lots or upwards. palance will be put under cultivation for the benefit of the company. This suggested establishment of a colony is especially desirable in order to make a port of entry at Ocean Beach. The part of the tract facing the ocean near Guadiana Bay is set apart for a business and residential site. The land which we are offering for sale is the best portion of the property, as regards location for shipping facilities, being nearest the water front. The quality of the soil also is all that can be desired. There is no tax on improved real estate in Cuba.

In Cuba the conditions for intensive agriculture are The staple crops of the Island will be oranges, grapefruit, lemons, limes, early vegetables, coffee, tobacco, cotton, bananas, cocoa, cocoanuts, mangoes and such products

as olives, grapes, almonds, etc., which can be successfully raised. All of these are very valuable and yield most bountifully when cultivated intensively. The labor required to plant, care for and harvest them is much less than farm labor usually is in Canada, and the climate is more temperate and pleasant. The soil is light and easily worked, and the opportunity for keeping bees and poultry and for dairying offered by the closeness of the large Havana markets, where products from these lines sell readily at high prices, greatly multiplies the sources of income for the planter and furnishes some-thing for each member of the family to do—work both

pleasant and profitable. Ballou, the historian, writing of Cuba, says:
"Nowhere on the face of the globe would intelligent labor meet with a richer reward. Nowhere on the face of the globe would repose from labor be so sweet." And, finally, it may be added that the expenses of liv-

ing are far less once a start is obtained. Bearing these truths in mind, let us take up the conditions and purposes which make up the present undertaking of those engaged in developing this favored spot. Extract from "Commercial Cuba in 1903," published by the U. S. Department of Commerce and Labor, August,

\* \* \* "It will unquestionably be easy and natural for Cuba to export to the United States and other countries large quantities of vegetables, especially those of a tropi-cal or semi-tropical habitat, and those which are in demand early in the year in northern communities.

"One great advantage possessed by the Cuban vegetable grower is that almost all kinds of vegetables enjoy in that Island a perennial growth, one crop following its predecessor immediately. "In this way the producer reaps the reward of two, and sometimes three, crops annually of all the different kinds of vegetables which he cultivates.'

Extract from report of A. A. Quint of Quibra Hacha "I planted a quarter acre with tomatoes; the yield was sixty crates of very large, fine tomatoes. The price in New York at time of picking was \$3.50 per crate." \* \*

### LAND IS THE BASIS OF ALL WEALTH

As a permanent place of residence as well as a health and pleasure resort, Cuba, owing to its climatic and scenic charms, is attracting wide attention. Any person from a northern climate can live in Cuba in summer with as much comfort as in Canada, while the winter months are, of course, very much more comfortable than in a land of snow, sleet and blizzards.

Soil and Products of Cuba

In no part of the United States or Canada is found a soil so rich, so fertile, so productive as in Cuba... There is no garden like this favored spot. It is perfect in soil and climate.

Three crops a year can be grown Four hundred years of Spanish misrule prevented beautiful Island, and thousands of acres of virgin soil now await the thrifty and energetic Canadian to make it the most productive spot in the world.

Remarkable Growth of Orange Trees

In a letter recently received is the following item: 1 visited a fruit farm and photographed an orange tree three years ago from setting. It was six inches in diameter at the base and about eighteen feet high, with branches five or six feet long and full of fruit. I also photographed a tree five years old which bore 5000 oranges last crop, and another seven years old, which bore 7000 oranges. Grape-fruit attains perfection in Cuba.

Oranges

It is claimed by the best authorities on citrus fruits that if all the available lands suited for the purpose in this part of the world were put into cultivation it would be more than twenty years before the market would be supplied to the same extent that it was previous to the freezes in Florida and California.

It must be remembered that an orange grove will mature here in one-third less time than in California or Governor-General Charles H Allen says: "A ten-acre

orange grove once in bearing, gives a comfortable income, sufficient to support a family in the best country style."
"When an orange tree is in full bearing it is valued at \$100."-Florida Fruits and How to Grow the

Profit on Oranges and Other Citrus Fruits

As an indication of the profits to be derived from raising oranges and other citrus fruits, I quote from an Official work on Cuba, recently published: "The person owning an orange grove in a country free from frosts is most independent and happiest person on earth full-grown orange tree will yield from 1000 to 5000 oranges yearly, and, like the lemon tree, begins to bear the third year. Before Cuba got its setting back during the war orange lands were selling from \$150 to \$300 per acre, and a three-year-old grove was worth \$1000 per acre. The old-est trees in Cuba are some 100 years old, and each year crop is greater than the previous year. No limit is placed upon the age of the orange tree; so in beginning an orange grove, remember, if four or five years are required to bring it into bearing, it will then continue to yield its golden harvest for generations to come, and when once in fruit you can sit beneath its shade almost in idleness and have an abundant competency.'

Gattle Raising

Grasses in Cuba have a most wonderful growth. Green all the year and very nutritious. Cattle-raising has al-ways been the chief occupation of the natives, who have a natural disinclination to the labor necessary in cultivating the soil for market. Pasture always green and no winter storms or no feed to prepare. Large numbers of cattle and hogs in fine condition and good breed are found in all sections of the Island. Havana and other points in Cuba furnish the market, the price being much higher since the Spanish-American war than in the

Cost of 20-Acre Banana Plantation. Including Care of Same for Each Year

300 banana plants to the acre. Selling price at plantation, 35 cents per bunch Cost of care of land, at \$10 per acre ..... \*200 Total cost .....\$1000 Estimated Income for a 2°-Acre Banana Plantation at End of Each Year. Estimating 85 per cent. of plants bearing ..... \$1785

Cost of care and marketing products ..... Net profits ..... \$1485 \*Note: an owner of a ten or twenty-acre banana plantation can largely reduce this cost of "care" by doing much of the work himself.

Truck Growing in Cuba

Of all agricultural pursuits, that of growing vegetables, as a commercial venture, has hidden in the possibilities much to attract not only the tiller of the soil but many of those who have surplus money accumulated in other than agricultural pursuits.

It is easily within the bounds of probabilities to estimate a crop of vegetables that can be grown during the winter months at a thousand to two thousand dollars' profit per acre, and if one takes into consideration the small vegetable places worked by the Chinese around Havana it would be reasonable to say into thousands of dollars per

No Danger of Overdoing

Won't this fruit business be overdone? we are asked. It will, provided that the United States and Europe quit growing, and our wide-awake transportation companies all get flat wheels and hot boxes. The United States is now buying millions of boxes of lemons yearly from Mediterranean ports. Cuba can grow every one of them. In 1894 Florida exported 250,000 boxes of early granges to Liver-

pool that sold at 20 to 30 shillings per box. This market alone could be worked up to 1,000,000 boxes of early oranges to go in before Mediterranean oranges are ripe. All we need is the fruit to ship and we will have more markets than fruits. It will be at best ten years before Cuba can begin to cut any great amount of ice in the markets of the fruit world.

And to do this we must plant at once ten to twenty thousand acres yearly. We can pay the outy and land our products in the markets cheaper than Florida or California can, and as to quality, we are without a peer.

Fish, Game and Animals Seven hundred varieties of fish, also crabs, oysters,

lobsters and turtles, are found in the waters surrounding the Isle of Pines. The sea and rivers which empty into it are literally alive with them. Sea-bass, red-snapper and pompano are the choicest eating. Parokeets and beautiful humming birds, brilliant as

winged jewels, quail and wild pigeons are found in the woods, and ducks along the coast. Such game is plentiful, as very few natives own guns, owing to the license of \$10 a year required of those who keep them.

There are positively no poisonous snakes or insects or dangerous wild animals on the Island. The largest four-footed animal found is the "hutia," about the size of a large squirrel. You can sleep in the open air in the woods or in a tent without the slightest danger from beast or reptiles. Mosquitoes and even common house flies are never troublesome in summer.

To Merchant, Mechanic or Clerk

The condition under which the average mechanic or clerk exists to-day is one of ceaseless toil, from morning till night, year after year. If he has a family, after paying the landlord, grocer and doctor, and buying coal and clothing, there is little left to provide for an emergency or old age. Contrast this condition with that under which one can live in Cuba. The owner of ten acres of land under cultivation will have an income double that which s earned by most mechanics, with the expenditure of one-

For a small sum he can construct a suitable house. His vegetable garden and fruits will supply a large por-tion of his food. There will be no rent bills, no coal bills and no winter clothing to buy Under these conditions he can lead an independent, healthful, out-of-door life, having a sufficient margin between his expenses and income to enable him to put aside each year a portion for His property, moreover, is constantly increasing in value.

Do you want a guarantee of independence in old age? Do you want insurance against poverty?

If you do, read every word of our Prospectus.

It points the way to a comfortable income for life.

It shows you how you can easily provide for the future. Give it your earnest attention. Read it carefully.
