G. W.

There is considerable rust. Some claim it is only ordinary vollow or brown rust, but others believe it is black rust; anyway, there is pleaty of it. About usual crop of straw. Were it not for the rust, crop outlook has never been better; don't know now how it will go. We have head abundance of rain; too much, perhaps. Crop outturn depends on the weather from now forward.

Morris—Whent west of Red River

signs of rust. More straw than usual. Crop outlook above average. Had abundant rain; no more needed now. About 40 per cent. of vegetables destroyed by cutworms and from five to seven per cent. of crops by floods.

Kenton—Expect grain cutting to

headed out two weeks; in milk stage. Oats just heading. Barley in shot blade. Flax in blossom. Corn three feet high. No hard frost damage, but some gophers and cutworms. There is a little rust in this district. More straw than usual. Good crop outlook. Rain has been abundant with the exception of the last three weeks. The crops up to two weeks ago were excellent but owing to the excessive heat of the last week or two the yield will be greatly reduced. A great many of the heads of wheat are turning white at the end and from present appearance there will be only two well-developed rows of grain on each side of the head.

well filled and hardening nicely; is in dough stage. Oats well filled and in dough stage. Barley dough stage, few fields ripe. Flax late blossom stage. Corn cobs well formed and early corn almost ready to use. Fodder corn about 4½ to 6 feet high; good prospects. The joint worm is destroying pects. The joint worm is destroying fully 20 per cent. of grain at present, and the percentage is increasing all the time. Earlier wheat is most affected with this insect; Marquis is showing most damage at present, but this may change later. Rust did a large amount of damage last week. Estimated that 30 per cent. of wheat is affected. The genuine black rust has shown up only since July 27. Straw crop heavier than last year, but not extra heavy. Wheat prospects poor, on account of rust and joint worm. Eatiful abundant in large and mowers. not extra heavy. Wheat prospects poor, on account of rust and joint worm. 107 Painfall abundant in June and early July; needed now. Hay crop is exceptionally good, two tons being cut per acre from many fields. Corn crop

Oats in milk and dough stage. Barley in dough stage. No flax. Corn very late and very little of it. The Seager cats are heaviest yielding and nowhere lodged. A lot of barley is lodged. More than usual damage by wind and hail. No frost so far. Less than usual loss by cophers and cultivariant usual loss by gophers and cutworms. No signs of rust so far. More straw than usual. Crop outlook good, and certainly above average, due mostly to abundance of rainfall, which has killed all cutworms. Rain excessive until

nourishes the starved nerves back to health and vigor. By noting your increase in weight while using it you can prove positively the benefit being derived from this great food cure.

Edmanson, Bates & Co., Limited,

Dr. Chase's Nerve Food

are needed now. The yield of wheat much better than that of other reals, as it is always sown on the ean land and is comparatively new this district. **GRAIN IS RIPENING** in this district. Melita—Fall rye being cut; barloy this week; wheat about Aug. 10. Wheat now in dough stage; some in milk only. Outs in milk stage. Barley ripening. Flax just out of bloom. Corn not tasseling out yet. About 2500 acres destroyed by hail. Gophers were about as plentiful as usual. No cutworms this year, nor no frost damage. There is considerable rust. Some claim it is only ordinary vollow or

THE PROPERTY OF THE PARTY OF TH Most of Districts Report Wheat and Oats in Milk and Dough Stage.

CROPS DISAPPOINTING

Rust Has Caused Much Damage to Number of Fields-Some Yield Nothing.

The following reports on crop con-ditions have just been received from the Manitoba Government's district re-presentatives and a few other selected

the province:

Birtle—Grain cutting will not begin before August 20th. Summer fallow wheat in milk stage; spring plowing about blossom. Early oats well advanced; late oats very short straw and developing slowly. Some barley ready to cut in two weeks. Little more than usual damage by hall and cutworms. No sign of rust. Less straw than usual. Prospect of average yield. Good crop promised wherever a good seed bed has been provided. Late seeding after May 12 not developing as well ing after May 12 not developing as well

as early seeding.

Carey— Cutting should commence
August 7; grain ripening very fast. Allearly wheat is headed; hot weather has damaged wheat. Oats just beginning to turn: no apparent damage. Early barley will be cut by August 10; late barley appears to be better crop. Very little flax grown here this year. Corn just shooting into tassel. What little just shooting into tassel. What little we have looks well. Until ten days ago we have looks well. Until ten days ago the crops generally bid fair to be as good as last year, but hot weather of past ten days has certainly done considerable harm. No loss by hail. Late crops affected by cutworms. No frost to date. Red rust in almost every field of fallowed grain and black rust very much in evidence in some places where the crops are heavy. About same amount of straw as last year. Crop outlook not above average. Have had sufficient rain; not too much for crops, but it has retarded summer-fallow. Afraid the wheat crop will be disappointing. Cool weather may help some-what; but much damage has been done. Do not think wheat crop here will be much over half of last year's yield. Up

to date oats and barley look well, if not better, than a year ago.

Ripen in Few Days.

Ethelbert—Grain cutting should commence August 15. Wheat and oats in head; barley nearly ripe; no flax; no corn. Marquis wheat will ripen a few days before Red Fife. From two to three per cent. cutworm damage. No In Banner oats I have noticed a large

Killarney—A small amount of grain, will be cut this week. Cutting general from Aug. 10 to 15. The wheat is quite

green fixed them where used.

No Frost So Far.

Lundar—Cutting expected to begin

Aug. 10 to 15. Wheat in milk stage.

now forward.

Morris—Wheat west of Red River badly damaged by rust and nearly 50 per cent. of fields have reached the black stage. Leaves nearly all dead and stalks about void of nourishment. Rust has reached the glume in majority of cases. Grain coloring rapidly. Fields that a few weeks ago promised 25 to 35 bushels per acre will yield around 15 or less. In many fields from half to one inch top of heads will yield nothing. This is most prevalent in Marquis, the Red Fife holding its own until now. Chief cause has been extreme heat during past two weeks. Heavy summer fallow crops will suffer most. Wheat east of field River appears much better, but rust is

River appears much better, but rust is advancing rapidly. Many fields nave reached the black stage. Yield will be around 20 bushels. Around Letellier has suffered badly, but crop is further advanced. Cutting is general, yield being around 12 bushels. Considerable demage. Winning 12 Morris. image, Winnipeg to Morris. Help

very scarce.

Neepawa—Grain cutting will start about Aug. 15.—Early wheat is in the fough; later wheat in milk stage.

Oats in the milk. Barley in dough Oats in the milk. Barley in dough stage. Flax in good blossom. Corn tasseling out. No hall or frost dam age; a little more than usual damage by cutworms in early spring. In nearly every field red rust can be found. Its progress depends on the weather. About usual amount of straw. Good crop outlook. Abundant rainfall.

Little Above Average.

Portage la Prairie.—Present prospects are that the harvest will start Aug. 15, some odd fields of barley being cut now. Wheat in the dough stage, oats in the milk, barley just headed, flax in bloom, corn not in flower yet. Slightly more hall damage than usual. Cutworms did harm, but no frost nor gopher damage. Red

but no frost nor gopher damage. Red rust is quite evident, but very little black rust as yet. Red rust confined mostly to leaf, but some on stem. Black rust also on leaf and stem. No more straw than usual. At present crop outlook is a little above average. Rain has been abundant; no more needed at present. Wheat on summer fallow badly down and twisted; must have coal weather or it will In Banner oats I have noticed a large number of the lower branches of the panicle drying up and bearing no

commence about Aug. 20; not general till about Aug. 25. Wheat in milk. Oats on summer fallow in milk stage; on early spring plowing in the dough; late plowing in shot blade. Barley just nicely headed; sown mostly on old or dirty ground during first ten days of June. No flax. Corn delayed greatly by coolpess in June. Ninety per cent. of total grain crop is oats. More than usual hall dam-Ninety per cent. of total grain crop is oats. More than usual hall damage. No frost. Less than usual damage by gophers and cutworms. No sign whatever of rust. About average straw crop. Crop outlook above average. Rainfall has been just right. Grain is filling nicely, but a good rain just now would materially increase the yield. Volunteer and wild oats, as well as mustard, arc very prevalent in the carly spring plowing. These decrease the yield prospects considerably.

prospects considerably. Swan River.—Grain cutting should Swan Eliver.—Grain cutting should commence between Aug. 15 and 20. Some fall wheat cut this week. Wheat all headed and some in bloom. Oats and barley 90 per cent. headed. Corn three feet high and growing rapidly; only fodder corn grown. Manchester fall wheat rendy to cut on July 31. Slight hail damage in Kenville district. No frost or gopher damage. Tame strawberries of the Grandpa, Wonder and Senator Dunlop varieties are yielding well. Mr. Claggett of Boweman has taken over 100 crates and roots promise well. Potato bugs were very bad in places, but the Paris sells some locally.
