ments to the United Kingdom,

During the earlier part of this

year, which is now practically closed,

so far as our lumber shipments are

concerned, we had occasion, several

times, to state that the lumber trade

reports from several quarters to the

ket. In this matter, as in all others,

however, our aim was to be correct.

for in connection with an industry

employing so large a proportion of

our people and so much of the busi-

ness capital of the country, no good

can come, while much harm may re-

abroad, either through the press, or Holland.

sult. from incorrect statements going

CONDUCTORS TAKE IT. Blotches, Pimples, Humors on the Face and Neck Disappear.

A Sovereign Remedy of the Province, notwithstanding the for Rheumatism!

MONTREAL, P. Q., Oct. 17, 1879. H. R. STEVENS:
Dear Sir - 1 most cheefuily add my testimonia:
the great number you are daily receiving in
our of your Vegenius. I have been troubled
the rheumatism for several years; also with
stehes and pluples breaking out upon my faced neck.
A friend recommended Vegenius, and, after
sing several seciles, I have had no more troublethe rheumatism, and the blotches on my face and
whe have disappeared. I have recommended
therring so some of my friends who were troublesterring so some of my friends who were troublein rheumatism, and they have used it with good
coses, and I will recommend it to all who are
sublied in the same way.

Vegetine.

Dr. Callier Surprised. VEGETINE CURED HIS DAUGHTER. HERSVILLE, Chilton Co., Ala., May 15, 1878 Dear Sir—My daughter has been afflicted with casal catarrh, affection of bladder and kidneys, and is of scroulous disthesis, and, after having exhausted my skill and the most emment physicians of Selma, is that resorted to the use of your Veontrung (without confidence), and, to my great surprise, my daughter has been restored to health. I write this as a simple act of justice, and not as an advertising medium. s an advertising medium.

INTRODUCTION OF CARP. The most important movement made in the fish-breeding division of the fishery department for some time, is the ster which has been taken towards the intro. duction of the German carp into our Can adian rivers. The carp is known in Germany as the "poor man's fish," because it is more plentiful and is produced in riv rs unsuited for the higher order of fish, and what for years the method in whitefish is of consequence cheaper. It is extremehatching was. The ova were put into a ly posses, of rapid growth, reaching three tray, through which a stream of water or four pounds in one year, and up to four unceasingly flowed. During the time the teen pounds at its full growth; while bet ova remained in the incubating condition, ter thon all, it thrives upon the very fun-

from day to day large numbers, though gus-producing or vegetable matter which relatively to the whole number few, of will kill a member of the salmon family. The carp is a vegetable feeder, in contradistinction to most of the other fishes which are animal feeders. Therefore, the hip Jeannette is safe, with all on boards ponds and streams abounding through the well and all equipments intact. He Province and surcharged with organic equipped and sent out on his own account matter or spohrs are exactly adapted for a party of the most experienced explorers the sustenance of the carp. An experiment of how this fish would thrive in sboard the Jeannette were much astonished America was made three years ago by when informed by the Siberian explorers Professor Baird, who brought several from sions and practices of some of those confoul confederacy, and was spoiled. It he had created for them. They throve ADVANCE questioning the soundness of a pretentious censure administered to other distinguished writers on fishes, have lately pointed out that the marked de- maturity. Last season Mr. Wilmot, 11th, in lat. 77, lon. 157. The crew em cadence of the salmon in several of the through Professor Baird's courtesy, ob. barked in three boats, which were seps Scotch and English rivers is due to the tained thirty or forty carp, which he has rated by wind and fog. No. 3, with destructive work of the fungoid pest, but kept since. Most of these lived, and eleven men, Engineer Melville command whether the pest is a protoplasmic parasite have thriven so well that Mr. Wilmot had ing, reached the mouth of the Lena, Sept. or a vegetable aggressive excresence, has several ponds near the hatchery ready for 18. Subsequently No. 1, with Capt. not been defined. By the way, this might the reception of a sufficient number for DeLong, Dr. Ambler, and twelve men, prove an interesting study for some of breeding purposes. Next season, therefore, hundreds of thousands of carp fry was short, to anticipate them somewhat croscope. BLACKSMITH SHOP HENDERSON STREET, formerly occupied by James Hays, where I intended carrying on general Blacksmith Work. I shall give particular attention to HORSE SHOEING, Scantling Wanted CURIOSITIES IN THE HATCHERY.

Mr. Wilmot besides having a special terms so strongly protested against by other, the process going on as well on the eral scale a naturalist, and a taxidermist taste for ichthyology is likewise on a genas well. In his collection of fishes he has several interesting specimens. A few days press or people to do anything but for the continuous motion would addle ago he received from Mr. Mowatt, the Sewing Machines. fishery officer at Restigouche, a male salmon, which in proper season would weigh wich. At the present there are in that sixty pounds. Indeed, it is almost as hatchery one hundred and fifty jars, each containing upwards of 150,000 eggs, or the Branch Office of The Singer whole aggregating about 24,000,000, The to show their action, or rather their lack principle present in the glass jar existed of action, through the winter season. The n a tin jar which had been invented by water is about half a degree above the Corner St. John & Duke Sts. Mr Wilmot several years ago, and been freezing point, and this keeps the fisher used for some years past in the Newcastle | torpid. There is a bass, and during the hatchery. A patent, after the invention, writer's stay, two hours, that fish never was taken out in Washington, but nothing moved a fin; it was poised just above an THE GENUINE SINGER SEWING MACHINE was charged to any one for its use. After eel, which lay like an S, and moved not, pired, and an "enterprising Yankee," get. Mr. Wilmot says "he will remain that Over Four Millions in Use! ting the idea from the Newcastle tin jar, way till the spring." This exemplifies the Tons. Sup. ft. deals, etc. 79,288 73,602 000 shave to go further away from the mills have to go further away from the mills and booms every year for logs, and to 31,475 29,106 000 expend much time and labor in making 18,763 000 and booms every year for logs, and to 31,475 29,106 000 expend much time and labor in making 18,763 000 expend much time and labor in maki OVER HALF A MILLION SOLD over, and thought he should be "allowed one and the same. The Canadian pickerel, The GENUINE SINGER SEWING MACHINE has been awarded the first premium over all others more than two hundred times at Great Wor.'ds' Fairs, at Stare Fairs and at County Fairs, in every part of the United States.

Three quarters of all the Sewing Machines sold throughout the world in 1890 were "Singers," and there must be a reason for that. When any of our style of machine used in millions of homes, leads all the other kinds to such an extent as that they A RASCAL :- Charles R. Ray, ex- something" for the use of his patent. Mr | called frequently in the Lower Provinces 926 000 Small operators, who could live at Mayor of St. John and Chairman of Wilmot was much amused; certainly did the pike, is a fine fish, and attention has 4,642 000 home while getting out a few hand and attention has a few hand attention has been given to its property of the City has not treat the request arrival to the pike, is a fine fish, and attention has home while getting out a few hundred the Water Commission of that City, has not treat the request seriously. But he been given to its propagation. But the 218 000 trees, and whose work aggregated quite absconded. He owed about \$20,000 set at work, and instead of using a glass real Canadian pike is a voracious monster, which a few years ago left the lakes at the round stock a few years ago, are becom- his departure he borrowed some \$2,000 or's jar, he had his, entirely constructed head waters of the St. John River, and ravaged the St. John. But the Maritime people must not think that the Canadian pickerel which Mr. Wilmot is putting in the rivers has any kinship to this monster
