

Emery Wheels.

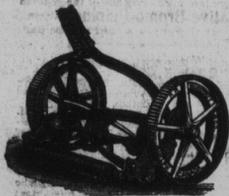

Hart Emery Wheels Have a wire mesh all through, which prevents them flying if cracked.

FAST CUTTING, SAFE, DURABLE.

Also Prescott Emery Wheels. W. H. THORNE & CO., Limited.

LAWN MOWERS.

Nothing adds more to the beauty of a place than a close, evenly cut lawn.

A good machine is necessary in order to have good work. The 'Woodyatt' runs easier, cuts closer and more evenly than any other.

Just a few left. The early buyers can get a medium size in low wheel at \$3.50. In high wheel at \$5.25 and \$5.75.

KANSAS NOT RUINED.

TOPEKA, Kas., July 16.—F. B. Coburn, secretary of the state board of agriculture, does not share in the general opinion that ruin will come upon Kansas, as a result of the present dry spell. The damage to hay and corn has been serious, but the deficiency will be nearly made up by the great crops of Kaffir corn and Alfalfa that have been raised. Mr. Coburn states that there are over 900,000 acres of Kaffir corn in the state which has not been materially affected by the dry weather. In addition to this there are forty million bushels of old corn in the farmers' hands. This of itself is nearly a fourth of the average crop. The farmer who stored his corn for the last two years will not be seriously crippled.

A PITCHED BATTLE.

HEREFORD, Texas, July 16.—Word reached this place yesterday of a pitched battle and wholesale killing between Mexicans and negroes who are working in the new Rock Island extension near Liberty, N. M., 100 miles west of here. The trouble originated in the killing of a Mexican by a negro a few weeks ago. The authorities undertook to arrest the assailant, but his friends interfered, and they were obliged to withdraw. Last week some 25 or 40 Mexicans armed themselves with Winchester and went after the negro. A battle took place, in which 15 negroes were killed and several wounded. The casualties among the Mexicans cannot be learned.

WOMAN ATTEMPTS MURDER.

PARIS, July 16.—P. Baudin, minister of public works, was shot at while driving to a cabinet meeting at the Elysee palace this morning. The author of the attempt upon the life of M. Baudin was a woman who was accompanied by a ten-year-old child. They approached M. Baudin's carriage, and suddenly drawing a revolver, fired at the man. M. Baudin was not hit and proceeded to the Elysee palace. The woman was arrested and gave her name as Olga, and said she lived at Nanterre. Her husband is a Pole and was an architect at Nice until 1896.

Madame Olga asserts that she had no intention of hitting M. Baudin, but that she fired her revolver in the air to draw attention to an alleged grievance of her husband. Her husband is described as Count Olga, a naturalized Frenchman, holding government receivership in Paris. He believes he is being deprived of money due him by the ministry of foreign affairs.

CABLED FROM LONDON.

NEW YORK, July 16.—The proposed continental boycott of American goods is taken very seriously in London city circles, says a London despatch to the Tribune. The view is, the correspondent says, that the menace of America is not merely a matter of trade. They profess to regard the question from a highly moral standpoint. They say it is no advantage to the world that a great nation should dominate it with ideals into which they never, nothing except money can enter, and with a system of government in which money is the controlling power. The ideals of Europe have ever been higher than that, and to drop to the American standard would be a fatal error.

PACKING HOUSE DESTROYED.

WICHITA, Kas., July 16.—Fire today destroyed the packing plant of Jacob Dill & Sons in this city. Four large buildings were burned together with about seven million pounds of meat in progress of preparation. The loss is \$650,000, insurance about \$400,000. Four men were hurt badly by a falling wall.

CROKER AS A TURFMAN.

NEW YORK, July 16.—Richard Croker has notified his English agent to have his American race horses and brood mares shipped to Wembley, says the World, and it is stated, will in future confine his racing operations to England, forsaking entirely the American turf. This step is believed to be due to the fact that Croker has been remarkably successful with his race horses in England this year, while he has been correspondingly unfortunate on this side of the water. It is said to be the ambition of Mr. Croker to win the Derby with a colt of his own breeding. His brood mares, for which he paid big prices, will be shipped to England. Beauallant and Bellair will be trained in England by Enoch Wishard, an American.

REPAIRS NEEDED.

It is at times like last evening that residents on neglected streets are compelled to suffer from the want of attention to the sewerage system. In the north end there are two streets in particular which would now be in much better condition had they been left alone and no attempt made by the city to repair them. On Newman street, which branches off the Adelaide road, a sewer pipe was laid and a pile of rocks heaped on top of it to such a height that they will never sink down. No catch basin was put in, and now the half of the street which is not a pile of rocks becomes, during a rain storm a veritable pond. Last evening the water on it was nearly two feet deep, and as it had no place to go, many of the residences were flooded, and yet these people have to pay taxes. On Metcalf street the same thing applies. Certain parts of Metcalf are altogether impassable, and on other sections the street is in a dangerous condition. Hammond street in Indian town is another street in which no catch basin has been placed, and on account of this the Star line warehouse was flooded last evening.

LABOR WORLD.

The Big Steel Strike is Now Fairly On—Other Troubles.

WILKESBARRE, Pa., July 16.—The strike of the stationary firemen began this morning. About 700 men are idle in this region. Many of the mines have closed down, throwing out of work 15,000 men.

WILKESBARRE, Pa., July 16.—1500 employees of the Kingston Coal Co. went on strike this morning in obedience to an order issued last night by the executive committee of District No. 1, United Mine Workers. The strike was ordered because of a reduction in the wages paid for "yardage" on narrow work in the mines. The company has been paying \$1.50 per yard, but last night it is claimed, the men were informed of a reduction to \$1.00 per yard.

PORT COSTA, Calif., July 16.—Four hundred men, who handle goods in the warehouses, have gone on strike. Work in all the warehouses is at a standstill and shipping is completely tied up. The men asked for \$3 a day for nine hours, and time and a half for all over time. The warehouses offered a raise of five cents per hour, which would be 30 cents an hour for ten hour work, but they refused to recognize it.

PITTSBURG, Pa., July 16.—There were no new developments in the great steel strike in this district during the early hours of the second day. All the plants closed yesterday were shut down again, and matters about the Painter Mill, Lindsay and Clarke's solar iron works, the Monongahela and Star tin plate plants were quiet. It was stated that Painters' mill was in partial operation, but the only men at work were a few Hungarians who were cleaning up about the yards. Replying to the rumor that the management had brought a strike breaker from Alabama, Asst. Gen. Manager Harper said: "We can break our own strike."

Supt. Albrecht, encountered a few protesters later in the plant would be running in full within a few days. Speculation as to the probable statement of the strike is active in all circles and among business men the opinion is that the combine officials and Amalgamated will get together before long and adjust the differences. Some of the officers were emphatic in stating that it would be arranged within forty-eight hours, yet they could not give positive information of any movement on foot to start negotiations.

President Shaffer was cheerful when seen this morning, and said he was entirely satisfied with the situation. He had been in communication with George Powell, president of the American Tin Plate Co., Protective and International Association of America at Ellwood City, who announced that his organization was in hearty sympathy with the Amalgamated strikers, and the statement was untrue that 3,000 dippers would continue work. It was reported that these men had decided to continue work because of the lack of co-operation of the Amalgamated Association, when the scale with the American Tin Plate Co. was adjusted a year ago. President Shaffer announced that strike benefits will go to the tin men from the time of the actual inauguration of the strike yesterday. They have a large fund, and the men remaining at work in plants outside of the big steel combine will pay liberally to support the strike. Moreover, many of the idle men are anxious for a vacation. He is preparing a circular of information on the strike.

NEW YORK, July 16.—President Charles M. Schwab of the United States Steel corporation and the other officials of the company now here, declined today to publicly discuss the strike situation. Mr. Schwab has been in conference with J. P. Morgan and others, but his attitude on the subject has been given to the public. It has been reported there would be a general conference on the subject here, and that also there was a movement on foot for the settlement of the strike, but confirmation or denial of these stories could not be obtained at sources of authority.

PITTSBURG, Pa., July 16.—A revised list of the plants of the three combinations affected by the strike was prepared this morning, together with the number of skilled workers. In the mills of the American Tin Plate Company 25 men are employed in three turns, in each as follows: Roller, rougher, doubler, helper, heater, heater's helper, catcher and screw boy and one shear man, who does the work for three turns, with two openers. Each mill's full quota of skilled men is 27. The Tin Plate combination employs 7,470 skilled men at its 166 mills. Of this number 2,250 skilled men are at work at fifty mills that have not been closed by the strike. The number of skilled men on strike is 5,220.

In the American Steel Hoop company there are 7,000 skilled workmen, and all but 250 at the Duncansville plant are idle. This makes 10,000 skilled workmen out at present. It is estimated that the unskilled labor in the various mills affected by the strike will run the total close to 74,000 idle men, made by the Amalgamated association.

EASY ON HIM.

"What is your vocation?" asked the Cannibal King, sternly. "I am a Weather Bureau man, your majesty," ventured the weather man, timidly. "That's his loss," commanded the Cannibal King; "he has been roasted enough by the people."—Ohio State Journal.

MURDERER EXECUTED.

AUBURN, N. Y., July 16.—Frank Wennerholm, the Chataque county murderer, was put to death by electricity in the prison here this morning. The current was turned on at 6:23 and in one minute and five seconds the man was pronounced dead. The nervous strain on the condemned man was telling when he took his seat in the chair, and he appeared to be on the point of utter collapse as the straps were being buckled by the attendants and the electric put in place. As the strap over the face was put in position the doomed man tossed his head nervously to one side and uttered a low moaning sound. When all was ready Warden Mead gave the word, State Electrician Davis turned on the current, and the body became rigid and strained in the chair. The current was of 1,800 volts and 7 amperes, which was reduced after two seconds to 200 volts for half a minute and then increased to its original strength for two seconds, when it was again reduced to 200 volts for half a minute and increased to 1,800, when it was turned off and the man was dead. The execution was highly successful.

AMERICAN TUFT HUNTERS.

NEW YORK, July 16.—A bureau for the purpose of arranging marriages between titled Europeans and American women of wealth is to be established in London by Frank S. Willard, a London correspondent of the World. It is stated that Mr. Willard is related to the late Frances E. Willard, the temperance advocate. The promoter of the scheme is quoted as saying: "You would be amazed by the number of women in the United States who would eagerly change their money for social position gained by wedding a titled man. We expect to do business all over Europe, but naturally a British title is the most negotiable. We propose charging a percentage on the income brought to the husband, and have fixed the rate for a title delivered to the wife."

NEWS FROM DAWSON.

SEATTLE, Wn., July 16.—Late advices of June 28 state that the gold payments to the outside this year have amounted to \$5,000,000 to date. News has just been brought from the mouth of the Hootaliqua river by steamer that a placer strike has been made on Lake Creek, a tributary to Lake Teslin, the source of the Hootaliqua. Ham, potatoes, and all kinds of fruit are selling in Dawson at exceedingly low rates and traders are losing money. Berries, peaches, apples and other fresh fruits are plentiful. Wesley Bayley, aged 22, was swept from a raft on the Yukon river, a short distance above Dawson, last week and drowned. J. W. Lowes, a native of Toronto, with a resident of British Columbia, was drowned near Big Salmon a few days ago.

NO NEED TO WORRY.

NEW YORK, July 16.—Large numbers of letters have been received regarding the proposed extension of the King's title, according to the London correspondent of the Tribune. The addition which seems to find most favor is "Sovereign lord of Canada, Australia and South Africa." Several correspondents suggest that the two sons of the Duke of Cornwall and York should be created Prince of Australasia and Prince of Canada.

BRIEFS BY WIRE.

A special to the Chicago Record-Herald from New Orleans says:—Louis Thomas, a negro, was lynched near Girard, La., last night by a mob composed of white men. Reeves' brewery works, at Alliance, Ohio, were destroyed by fire yesterday. Loss about \$100,000; insurance \$40,000. Alfred Meredith, an employee, was perhaps fatally injured. About 175 men are thrown out of employment.

A special to the St. Louis Globe-Democrat, from Cordova, Mexico, says: A train on the Vera Cruz and Pacific railroad was attacked recently by a large force of armed men at Tierra Blanca, a small station. Seven men on the train were killed. A force of ruffians is in pursuit of the mob. The cause of the attack is not known here. It is said to have been made by men who were formerly employed in the construction of the road.

THE WEATHER.

TORONTO, July 16.—Today and on Wednesday, light to moderate winds, fair and very warm, some local showers or thunder storms. WASHINGTON, July 15.—Eastern states and northern New York:—Partly cloudy tonight and Wednesday; probably occasional showers in south and west portions; not quite so warm in central and west portions; light southerly to southwesterly winds.

DRURY'S COVE EXCITED.

The summer residents of Drury's Cove had a fearsome time during the thunder storm of last evening. One head of a family, who is not a nervous man, said that all the storms he ever saw put together could not equal this one.

The cloud seemed to settle over the little sheet of water, which became black as ink; between the flashes that continually played over it. The spot appeared to the residents to be the center of a cyclone. The thunder roared and echoed among the cliffs. Children terrified, called upon their parents to pray, and all waited in fear of impending disaster. No one was hurt though the lightning struck several conspicuous objects. The lime kiln in front of the residence of Mrs. R. L. Smith was struck and slightly damaged. Several trees were injured and grass was burned in front of the residence of Mr. Rising. The young people will not soon forget that hour of terror.

THE BLESSED RAIN.

OMAHA, Neb., July 16.—Eastern Nebraska and Western Iowa received today an inch or more of rain, which began falling at 2 a. m. and relieved the drought and heated term. Rains are also reported in the Black hills of South Dakota. LITTLE ROCK, Ark., July 16.—Good rains fell over the larger portion of Arkansas. At Texarkana and Hot Springs wind and lightning did considerable damage.

Good advertising—even the best—may fail if you have not good goods or good values to back it up.—Printers' Ink.
