The authorities here are unable to believe that his ships fired on the fishing boats without warning. The press reports are so startling that M. Sazonoff, the Russian charge d'affaires in London, in the temporary ab-sence of Ambasrador Beckendoff, was instructed this afternoon to express to the British government the intense regret and grief with which the reports had been received and the desire of Russia to voluntarily make full reparation in the event of the Russian squadron being responsible for the unfortunate occurrence involving the loss of humin life.

ST. ST. Count Lamsdorff will see the emperor tomorrow and there is good reason to believe that his majesty may personally convey to King Edward not only his regret, if the reports should prove true, but his determination to institute a searching inquiry and fix the responsibility. It is rumored that the emperor personally received Admiral Rojestvensky's report at Cronstadt, but at 6 o'clock both the admiralty and foreign offices declared the report had not yet reached them
