

## WE CHALLENGE THE WORLD

A. Hanger. B. Grate-Bar. H. Header. R. Roller. R'. Shaking Bar.

The Improved New England Roller Grate has been adopted by three leading governments and leading steamship companies. 45,000 square feet, representing 240,000 horse power, now in use under boilers since 1891. Any size made to order and special estimates furnished by applying to

**W. BELLINGHAM & CO.,**

OFFICE-TEMPLE BUILDING,

185 St. James St., MONTREAL.

*Write for our Book on Steam Engineering.*

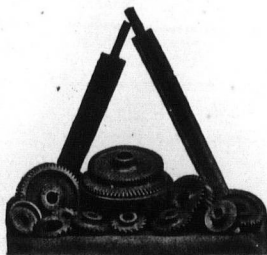

Ten per cent. saved in fuel equals 100 per cent. on the investment. We guarantee the ten per cent.

*Address all communications to P. O. Box 122.*

### GEAR CUTTING.

**RICHARD SCHOFIELD,**

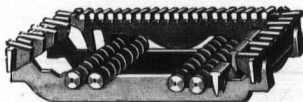

14 Court Street, TORONTO.

Automatic Power Knitting Machines. Fluted Rollers, Gear Wheels, Worm Wheels, Ratchet Wheels, Special Screws, &c., &c.

More in use than all other Patent Grates combined. **The Improved New England Roller Shaking Grates** for steamboats and stationary boilers cannot be equalled for economy in fuel and labor saving (*without infringing our patents*). It is a positive shaking grate which will burn any kind of coal. (Not a rocking grate.)

The Improved New Eng.

Sectional View, with only one Grate-Bar attached.

### Grain Elevators.
