Philadelphia, July 2. The Press has the following—Columbia, July 1.—The 1st New York, 1st Vermont, 1st Virginia and 18th Pennsylvania cavalry regiments left Frederick on Saturday and moved forward to Hanover. They arrived there Tuesday morning, when they were charged upon in the rear by the rebel cavalry of Stuart's. The national forces number about 1800 and the rebel force was nearly or quite 6,000. The battle commenced at 9 o'clock in the morning and continued until 7 in the evening. The contest was a succession of charges, recharges, advances, and repulses. Our troops fought desperately, capturing all the 1st S. C. regiment except 13. The rebels took about 60 prisoners. A piece of artillery belonging to the 1st S. C. was among our trophies.

Cruel Murder. A YOUNG MAN DASHES THE BRAINS OUT OF HIS LOVER; THE NEIGHBORHOOD HORRIFIED

WITH BEASTLY DETAILS. (From the Kingston Daily News.) One of the most cold-blooded and attro ious murders which it has ever been our painful duty to record, took place in the 11th concession of the township of Richmond on Sunday evening last. The perpetrater of the crime is about 20 years of age, a Canadian by birth, about the medium height, and a low mental calibre. His name s Zachariah Fralick, a son of Mr. Peter Fralick, a near neighbor of the father that this young man or young brute as the result proved him to be, had for some time been paying his addresses to Miss Elizabeth York, which be alleges were well reseived at first, accompanied by promises of marks which fell from his own lips, this feeling of jealousy, and the goading of his home at night, and, accosting her, put his tion, if the Macdo home, but told no one of the occurrence un-til he was arrested on suspicion the following day, when his clothes were still be smeared with her blood. IMPORTANT ASTRONOMICAL OBSERVA-Tions.—The annual visitation of the English Royalobservatory was made on the 6th of June. Prof. Airy in his report of his proceedings states that he has commenced a series of observations on star spectra-a branch of physical inquiry which of late has attracted great general interest, and which may lead to most important results. He states also that, from observations of the planet Mars compared with other observa-tions made in Australia, a value of the salor parallex has been obtained "exceeding the received value by about 1-24th part." This shows the earth to be nearer the sun by shows the earth to be nearer the sun by several millions of miles than has been supposed; and independent investigations made of late by other astronomers have led to the same result. It is also mentioned in the report that a new determination of the direction of movement in the solar system in space has been made, taking in account a very large number of stars, [above 1000,] the result of which investigation supports the deductions already obtained by other astronomers
