

Ottawa, August 14, 1917.

Sir,-

I beg to acknowledge the receipt of your letter dated the 9th ultimo in reference to water supply and repairs at Cape Croker Agency, and in reply to inform you that it has been decided to provide the necessary eave-troughing (22' around untroughed portion of the house, and connect to and repair eave-trough now on and to provide 25' of conductor connecting troughing with an new cistern in basement through rear outside wall.

To provide a new concrete cistern having an inner dimension of 5' x 7' by 6' in height with walls and floor not less than 10" in thickness. The concrete used to be in proportion of 1 cement, 2 of clean sharp sand, and 4 parts fine clean gravel sized thoroughly and well tamped in form to ensure density and satisfactorily hold water, for which a guarantee must be given.

To also provide an 12' x 30' enameled cast iron sink complete with brackets, 1 1/2" trap and galv. iron waste pipe connected and connected to drain, also cistern force pump of good quality erected on platform at sink having 1 1/2" pipe connected to cistern, for the price of sum of \$125.00 as quoted by D.J. Hunter, Esq., of Warton.

The Department also approved of a well being drilled for hard water in a suitable position near the building,

Isaac Lennox, Esq.,
Indian Agent,
Cape Croker,
Ont.
