

WILSON'S ANTI-BILIOUS and PRESERVING PILLS

are confidently offered to the public as a safe, mild, and yet certain vegetable cathartic and blood cleanser. They are suited to all climates and all constitutions, they exercise their curative properties on a great variety of disorders, because they are composed of a number of vegetable extracts, from which everything but the active medicine itself has been separated, thus allowing a large amount of curative material to be put into very small space.

WILSON'S ANTI-BILIOUS and PRESERVING PILLS strengthen the Stomach, assist in the process of DIGESTION, prevent the fermentation of food in the stomach, and thus cure HEARTBURN, WATERBRASH, INDIGESTION, DYSPEPSIA, &c. They not only increase the appetite, but also give the weakened stomach strength to carry on the work of digestion so that the food taken may answer its intended purpose of giving nourishment to the body, while they stimulate the intestines to carry off the waste matter.

Wilson's Anti-Bilious and Preserving Pills act energetically upon the Liver—they stimulate its secretions of bile, soothe its irritation, and allay the spasm of its duct which often closes its outlet and thus prevents the bile from being carried away into the intestines, producing Congestion of the Liver or a Bilious attack, or in its more severe form, Jaundice and Chronic Liver Complaint; in its milder form, Congestion of the Liver, by not allowing the supply of Bile, which is the natural purgative, to get into the intestines and work off the waste material in the stomach and bowels; induces Costiveness, and costiveness, if long continued, almost certainly brings on Piles, which are either Blind or Bloody Piles, according to the extent to which they arrive. Piles consist in the enlargement of the veins which carry the blood to the Liver from which the Bile is secreted; if the Liver is clogged up, so that the current cannot flow on, the increased quantity of blood stretches the coats of these vessels especially at their lowest part, that is at the fundament, till they swell out in bunches and inflame, and then burst in order to give exit to the contained blood.

EEL RIVER, N.B., June 11, 1877

I am hardly able to express my gratitude for the benefit which my daughter has derived from the use of DR. WILSON'S ANTI-BILIOUS and PRESERVING PILLS. She had been troubled with what the physicians call *Liver Complaint*, but our doctor failed to give her any permanent relief, although she tried his prescriptions effectually. She

had become melancholy, unhappy, and her constitution was much broken down by the use of mercury. She tried these PILLS, and soon began to get better. I am happy to say she has entirely recovered her health.

W. T. COBB.

WILSON'S ANTI-BILIOUS and PRESERVING PILLS used regularly in small doses prevent the Congestion of the Liver, by keeping up its secretions, and thus prevent costiveness and its consequence—PILES

ST. MARY'S, July 31, 1876.

I have been troubled with a torpid state of the bowels for six or seven years, which has been the cause of a good deal of suffering to me, and I had to deprive myself of many kinds of food, and used much oatmeal, &c., till I got Dr. WILSON'S ANTI-BILIOUS and PRESERVING PILLS, and the use of them at once began to regulate my bowels. I can now eat anything my family does, without suffering any inconvenience. It is about six months since I had occasion to use them or any other medicine. I most cheerfully recommend them to those who are troubled with constipation of the bowels.

T. C. DELAFIELD.

WILSON'S ANTI-BILIOUS and PRESERVING PILLS cure Bilious Headache, or as it is commonly called, Sick Headache. This is always produced by want of action of the Liver and Stomach, the fermenting food generates acid which gets into the blood, the retained particles of vitiated Bile also find their way into the circulation, and through it to the brains and nerves, poisoning them and producing pain in them. A dose of Wilson's Anti-Bilious and Preserving Pills taken at such intervals as the system requires, prevent these distressing symptoms, or if it has gone too far, one or two full doses are effectual for its cure.

MAITLAND N.S. April 30 1877.

I always was a strong opponent of patent medicines, calling them, as I thought them to be, a money-making imposition. But, sir, my wife, a woman of sixty years of age, and as much opposed to doctors as I was to patent medicines, has for several years past been afflicted with a *severe headache*. The unwelcome guest would renew his most insupportable visits frequently, and would remain for days at a time, during which my wife would have to be in bed, often in a state of derangement, caused by the violence of the pain. While she was in this state of suffering, a friend, who had been benefitted by them, chanced to come to my house, and he advised me to get a box of DR. WILSON'S ANTI-BILIOUS and PRESERVING PILLS, which I did, and the result was that it so relieved my wife
