

# HIGHEST AWARD BUFFALO EXPOSITION

Notwithstanding the evasive assertions and lying misrepresentations of unsuccessful would-be competitors, the indisputable fact remains that just as in the case of every representative exhibition or other contest since the invention of the Cream Separator twenty years ago, the **De Laval** machines have maintained their supremacy at the Pan-American Exposition, Buffalo, having received the Gold Medal on Cream Separators.

This is the highest and only award of its kind on cream separators. One other make of machine has received a Silver Medal, and another concern a Gold Medal for its combined exhibit of cream separators, Babcock testers, churns and other apparatus. With characteristic advertising honesty, the latter concern is now claiming this Gold Medal to be an award to its separators.

### OTHER GREAT EXPOSITIONS

The supremacy of the **De Laval** machines at Buffalo is a continuation of their triumphant record at all previous great exhibitions. At the World's Fair, Chicago, in 1893, they received the Gold and only medal awarded by the regular jury of awards and were the only separators used in the Model Dairy. At Antwerp in 1894 and at Brussels in 1897 they received the Grand Prix or highest awards. At Omaha in 1898 they received the Gold Medal, and again at Paris in 1900 the Grand Prize or highest award.
