WHEN haying time comes you cannot control weather conditions, but you can make the best of them if you use the rakes, tedders, stackers, loaders, and sweep rakes sold by IHC local agents. With a line of IHC haying tools in your sheds you can come out of the least favorable weather conditions with the highest percentage of bright, well cured hay. IHC haying tools are carried in stock or sold by local agents who can take care of you quickly in case of accident. It is their business to see that you are satisfied with the IHC haying machines and tools you buy from them. You cannot go wrong if you buy only haying tools with the IHC trade mark. Write the nearest branch house and get the name of the nearest agent handling IHC haying tools, and catalogues on the machines in which you may be interested.

Cut Down the Cost But Don't Cheapen Your Building

Bishopric Wall Board and Sheathing will not only save you money on material but will save 75% of the labor cost in finishing walls and ceilings.

'Bishopric' gives the best results because it is made of No. 1 Pine Laths imbedded, under great pressure, in Asphalt-Mastic on a resin surfaced cardboard. This combination means strength—proof against dampness and vermin—warmth in winter—coolness in summer.

For rough cast (Stucco Work) or cement, Bishopric Stucco Board is ideal to work on and makes a moisture-proof background that is without a competitor.

If your dealer does not handle our products, we will gladly send you samples and an illustrated booklet showing houses built of our materials, together with full details as to cost delivered at your home. 52

ONE MINUTE WASHER COMPANY, Toronto

Note the solid, clean fire in the Pease Fire-pot—no chance for ashes to clog—no chance for the ashes at the side to blanket the fire and prevent the heat from radiating freely from the sides of the fire-pot.

In a Pease Furnace all the heat possible given out by the coal goes directly to the heating surfaces, and every possible unit of heat is utilized.

Pease "Economy" FURNACE

Pease Fire-pot.

The "Pease" fire-pot is built in two sections—do you note that? This prevents the cracking so common with old style one piece fire-pots, due to the unequal expansion or contraction of the metal caused by the fire. It also makes it absolutely gas proof. Then in two shakes of the easy-to-work, upright shaker the fire is cleaned of ashes.

This is but one of many "Pease" advantages that will surely appeal to your sense of efficiency and economy.

Instal a new Pease "700" Series Furnace in your home just as soon as the weather gets mild, and have a healthy, warm and cosy home next winter. Don't wait until Fall—rush jobs are never satisfactory. Remember a Pease Furnace

"Pays for itself by the coal it saves."
