TION THE GUIDE

Get more pleasure from your Ford. Make it earn big dividends in the fields and on the road. Use a

"Ford-a-Tractor"

Does the Work of Four Horses

Doing all the heavy farm hauling, summerfallow, harvesting and fall plowing with a "Ford-a-Tractor" instead of horses is becoming more common every day. This attachment saves you hours on every job and you can run it all night if necessary. All gears enclosed and run in oil. Ask us about its many special features, including the W.D.C. Cooling System, which changes the waters in the cylinders six times a minute and is the only system that prevents over heating under all tractor conditions.

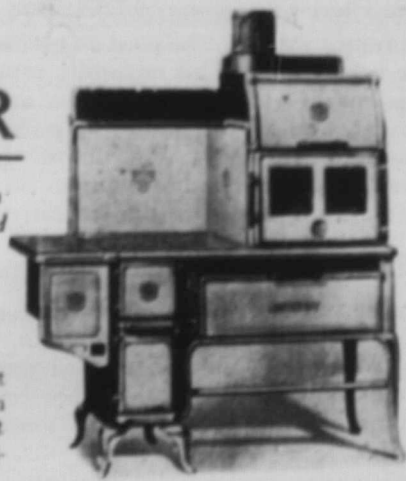

K.M.C. Transformer
The only successful carburetor for using Kerosene in Ford cars. Ask for particulars.

Dealers and Representatives

are wanted in every locality to demonstrate and place these attachments. Get our interesting proposition. Farmers and agents mail coupon today.

J. D. ADSHEAD COMPANY, WINNIPEG AND CALGARY
Please send me full particulars of "Ford-a-Tractor."

THE NEW LIGHTER DAY RANGE

The greatest improvement ever made in stoves. An improvement brought about by a study of customers' needs.

NO MORE BACK-BREAKING WORK

High oven, high warming closet, newer and better heat control, greater economy in use of fuel, easier to keep clean, attractive appearance brightens the kitchen. We could give you many points in its favor without saying a word about its ability as an excellent cooker and baker. The position of the oven makes possible finer cakes and roasts than any other stove on the market.

Dept. B

Fred Foster says his LISTER does more work than other makes that cost from \$500.00 to \$700.00 more

Writing us from Spence, Sask., in February he tells us, that last year he threshed 100 bushels of wheat in nine hours and 1,500 bushels of oats in eight hours, and was very much surprised in the fine way it cleaned the grain.

Note the Six Wheel (patented) Truck which positively eliminates vibration.

This machine is notably built very strong and handy to adjust, and does more work than other makes that cost from \$500 to \$700 more. The Lister works perfectly. I built up large areas of grain and had very few losses on the largest machines made, one built without a man plucking one sack full of straw.

This is only what one farmer writes us. We could go through our correspondence, and give you similar quotations all telling the same story. Lister Ideal Threshers are built in two sizes, 22 x 36 in. and 26 x 42 in., and are operated by Lister or Manitoba engines. Ask for Illustrated Catalog. Refer to Dept. C.

OTHER LISTER LINES

- "Lister" and "Canuck" Gasoline and Kerosene Engines—Grain Grinders and Crushers—Milling Machines—Cream Separators
- Urbane—Ensilage Cutters—Saws—Sawing Outfits—Pumps—Pump Jacks—Power Pumping Outfits
