

Blasting Accessories

E. B. Caps Made in No. 6, No. 7 and No. 8 strengths, No. 8 being twice as strong as No. 6. We strongly recommend our strong blasting caps. They more than pay for themselves in decreasing fume and getting increased work from the explosive.

Blasting Machines Made to explode from 10 to 150 E. B. Caps. These batteries are made with particular care and can be absolutely depended upon to do the work.

Connecting Wire Is especially adapted for our E. B. Caps. Experience has proved that the additional capacity of 20 gauge to carry ample current for a large number of caps more than covers the additional cost.

Leading Wire Made single and double strand. Our single strand leading wire is made of copper wire, is well insulated and adapted for use in larger blasts. Double strand insulated wire is found convenient for use in mines or other places where wires have to be moved frequently.

WE SUPPLY ALL OTHER ACCESSORIES
NECESSARY FOR BLASTING

Canadian Explosives, Limited
