## War News.

### Messages Received Previous to 9 a.m.

**OFFICIAL.**  
**LONDON, July 8.**  
The Governor, Newfoundland: In Gallipoli the Turks made a general attack on the 5th. The attack failed completely. The enemy's losses were very heavy, and ours negligible. The French Government report further severe fighting on the heights of the Meuse, in the Forest of Apremont, on a front of about 760 yards. The Germans penetrated the French first lines, but elsewhere were repulsed with very heavy losses. Subsequently a portion of the lost trenches were recovered.  
The Russian Government reports a successful offensive at many points. Near Krasnik 2,000 prisoners and several machine guns were captured.  
**BONAR LAW.**

### SAYVILLE PLANT TAKEN OVER.

**WASHINGTON, July 8.**  
The United States Government today took over the Sayville, L.I. wireless station, the only direct means of communication between the States and Germany. Secretary of the Navy, Daniels, announced that Capt. Bullard, in charge of the naval radio had gone to take over the station, and would continue its operations with naval forces.

### CARRANZA FORCES WINNING.

**WASHINGTON, July 8.**  
Carranza forces have pushed their attack on the Convention forces, defending Mexico City up to within ten miles of the capital. Their military trains are operating this close to the city. State department despatches from Vera Cruz to-day gave this report.

### NO ANSWER TO GERARD'S INQUIRY.

**WASHINGTON, July 8.**  
President Wilson has decided that there will be no answer to Ambassador Gerard's inquiry regarding instructions concerning the draft submitted to him by the German Government as to its note on submarine warfare, and that no comment will be made by the States until Germany's formal reply is delivered.

### GERMANY'S REPLY EXPECTED.

**BERLIN, July 8.**  
The German reply to the American note regarding the Lusitania and submarine warfare, according to information obtained here, will probably be delivered on Saturday, July 10, or possibly even to-morrow. The general tenor and motive of the Government behind this proposal may be communicated confidentially to leading representatives of the press to-morrow.

**STAFFORD'S PHOROTONE COUGH CURE.**

## Cold Storage for Florizel.

We understand that while at New York this trip, the Red Cross Liner Florizel had a cold storage plant installed on board for the purpose of bringing fruit and vegetables here in good condition. It is also to be used for the exporting of our fresh fishes. It is not unlikely that her consort, the Stephano, will also carry cold storage. The Florizel sails from New York at noon to-morrow for this port coming via Charlottetown.

## Here and There.

**LOADING FOR GLOUCESTER.**—The ship, Monitor loading codfish at Woods' Island for Gloucester.

## LORD MERSEY'S DECISION.

**LONDON, July 8.**  
Lord Mersey, presiding at the enquiry into the sinking of the steamer Falaba to-day, declared that the blame for the catastrophe must rest conclusively with the officers and crew of the German submarine. He added that the submarine made no effort to save life, and probably could not do so without endangering itself. Lord Mersey said he was satisfied that the witness who had described the lifeboats as rotten, was mistaken, and that the damage sustained by some of them in launching was not due to neglect on the part of the company crew. The men in the rescue boats were praised for their courage and kindness. The allegations brought to the attention of Lord Mersey after the conclusion of the hearing, that the Falaba sent signals calling for help, were without foundation.

## BRITISH SUBMARINE SINKS GERMAN WARSHIP.

**LONDON, July 8.**  
The British Admiralty to-night, states that it is officially announced that Petrograd to-day that the submarine which made a successful attack on the German warship on July 2nd in the Baltic was a British boat. This statement by the British Admiralty contained the first public announcement intimating that British submarines were operating in the Baltic Sea. It is presumed that the under sea boat passed through the Cattagat from the North Sea to the Baltic Sea, then went eastward 200 miles, as the Bay of Danzig, where the warship was attacked, lies in the southeastern part of that body of water. The distance from an English port to Danzig, is about 900 miles. The Russian official statement, announcing that a German warship had been sunk by a submarine, said that the battleship which was steaming ahead of the German squadron, was at the entrance to Danzig Bay, on July 2nd, when she was blown up by two torpedoes fired by a submarine.

## SELF-DEFENSE JUSTIFIED.

**LONDON, July 8.**  
Merchant vessels of belligerent Powers are entitled by the established and uninterrupted usage of the sea to carry and use armament in self-defense, said Lord Robert Cecil, Parliamentary Under-Secretary for Foreign Affairs, in reply to a question in the Commons to-day. Several neutral Governments, he said, were communicated with in this matter, at the outbreak of the war, and several more have been approached since. The principle of merchant ships carrying arms for self-defense has been generally recognized. British ships, so armed, have been trading regularly with various countries since an early stage of the war. Commander Belair's question was whether, in view of the unusual character of the German attacks on unarmed merchant vessels, the Government would ask all neutral Governments to allow merchant vessels armed for the purposes of self-defense with a gun in the stern, to trade with their ports, in spite of the fact that they carried a gun.

## FIRE CAUSED BY EXPLOSION.

**NEW YORK, July 8.**  
The fire aboard the Minnehaha was caused by explosion, according to a wireless received from Capt. Clark. At the time the fire was said to have been mastered. Capt. Clark's message read as follows: "Fire caused by explosion, now under control by suffocation and steam. Much smoke in hold. Deemed it expedient to make for Halifax. One of Chebucto Head 9 a.m. Friday. Advice agents." The message came by way of Cape Race.

## ASK FOR EDENS' AND TAKE NO OTHER.

## AT THE NICKEL.

**THE FOUR PART PHOTO-PLAY MASTERPIECE**  
**"ONE WONDERFUL NIGHT,"**  
with FRANCIS X. BUSHMAN, the man who was voted the world's most popular photo-player. A wonderful mystery play of heart throbs and dire needs, a story that will thrill and entertain. Written by Louis Tracy.  
**"The Hazards of Helen,"**  
One reel of the thrilling railroad series. To enjoy this great picture see it from the start.

## Ever Ready Hot Water, Night and Day.

**FOR THE NURSERY.**  
"The bath ready for baby, when baby is ready for the bath" should be an advantage of every housewife—who should also keep in mind that any trouble saved to the nurse makes for a well-ordered, contented household.  
**Gas Water-Heaters**, whether of the instantaneous or circular type, offer the convenience of available hot water "upstairs, downstairs, and in my lady's chamber,"—without any labour at all—Independently of the state of the kitchen fire.  
The cost is reasonable.  
**FOR THE BATHROOM.**  
An uncertain supply of hot water in the bathroom is a frequent cause of annoyance.  
Hot water can only be secured, usually, by getting the cook to act as stoker, but at what a cost!  
Think of the coal that is wasted—the fatigue of coal carrying—the after labour of grate cleaning—and the discomfort of a hot kitchen in warm weather!  
A Gas Water-Heater is economical, because it only heats the water actually required; and labour-saving, because there are no coals to carry, no fires to clean, no ashes or dirt to remove.  
The master of the house has hot shaving water and a hot bath whenever he wishes without delay or trouble.  
**HOT WATER FOR THE HOUSE.**  
When "Spring cleaning days" engross the busy housewife, then the convenience of an unlimited supply of hot water on the upper floors is brought home to her with special force.  
But at all times—apart from convenience—a gas water-heater makes an irresistible appeal to the housewife from the point of view of dealing with the domestic problem.  
Later-day domestics are difficult to keep unless due consideration is shown by saving them unnecessary drudgery—and in the category of unnecessary drudgery may be included the toll of carrying hot water or coal upstairs, the cleaning of grates and the removal of dirt and ashes.  
The gas water-heater renders such labour superfluous.—may12,14

An uncertain supply of hot water in the bathroom is a frequent cause of annoyance.  
Hot water can only be secured, usually, by getting the cook to act as stoker, but at what a cost!  
Think of the coal that is wasted—the fatigue of coal carrying—the after labour of grate cleaning—and the discomfort of a hot kitchen in warm weather!  
A Gas Water-Heater is economical, because it only heats the water actually required; and labour-saving, because there are no coals to carry, no fires to clean, no ashes or dirt to remove.  
The master of the house has hot shaving water and a hot bath whenever he wishes without delay or trouble.  
**HOT WATER FOR THE HOUSE.**  
When "Spring cleaning days" engross the busy housewife, then the convenience of an unlimited supply of hot water on the upper floors is brought home to her with special force.  
But at all times—apart from convenience—a gas water-heater makes an irresistible appeal to the housewife from the point of view of dealing with the domestic problem.  
Later-day domestics are difficult to keep unless due consideration is shown by saving them unnecessary drudgery—and in the category of unnecessary drudgery may be included the toll of carrying hot water or coal upstairs, the cleaning of grates and the removal of dirt and ashes.  
The gas water-heater renders such labour superfluous.—may12,14

## Cold Storage for Florizel.

We understand that while at New York this trip, the Red Cross Liner Florizel had a cold storage plant installed on board for the purpose of bringing fruit and vegetables here in good condition. It is also to be used for the exporting of our fresh fishes. It is not unlikely that her consort, the Stephano, will also carry cold storage. The Florizel sails from New York at noon to-morrow for this port coming via Charlottetown.

## Here and There.

**LOADING FOR GLOUCESTER.**—The ship, Monitor loading codfish at Woods' Island for Gloucester.

## LORD MERSEY'S DECISION.

**LONDON, July 8.**  
Lord Mersey, presiding at the enquiry into the sinking of the steamer Falaba to-day, declared that the blame for the catastrophe must rest conclusively with the officers and crew of the German submarine. He added that the submarine made no effort to save life, and probably could not do so without endangering itself. Lord Mersey said he was satisfied that the witness who had described the lifeboats as rotten, was mistaken, and that the damage sustained by some of them in launching was not due to neglect on the part of the company crew. The men in the rescue boats were praised for their courage and kindness. The allegations brought to the attention
