CREAM-RAISING METHODS.

For a long while it has been accepted as dairy gospel that in gravity creaming the best method was to submerge the can containing the milk in ice cold water, but the idol smasher is at hand. At a New York State dairy conference, as reported in Hoard's Dairyman, Col. F. D. Curtis showed the audience how to raise all the cream in an hour, and without the use of ice. One can having a capacity of about two and half pounds, to which was added one pound of water at 58°. The jar was put in a bucket of water at 70°. Result: Cream all up in an hour. The same experiment was performed at Meredith, with same result.

The milk after the cream was removed, having been left 48 hours, was removed, without the appearance of any more cream. Some results were produced, last winter at the institutes, where the experiments were conducted in various degrees of success. When ice water was used, the cream was usually up in half an hour.

At the close of the conference Mr. Curtis asked Mr. L. B. Fairweather, of Albany, to make some experiments in the direction and report results to him at Meredith, which he did in his dairy house, the following the conference. Following is his official report of two experiments:

One-half pint of milk set at a temperature of 90°; half-pint of water added at 50°. Temperature of dairy room 61°. Jar not set in ice water. First line of cream observed in 25 minutes. Cream all up in 40 minutes. Milk left 8 hours without the appearance of any more cream.

NUMBER TWO. Half pint of milk set at 92°. Same of water at 41°. Vessel set in water at 52°. First line of cream observable in 15 minutes. Full cream line in 25 minutes. After creaming shrunk 1/4 of 1 per cent. after being taken from the cow.

Now, if these results can be obtained with half a pint of milk why not with a vat of it, and, where one has no ice, nor mercury to 55° or 60°; why not try it for the purpose of speedily and freely raising the cream?

A BRUTAL MURDER. GRAND RAPIDS, Mich., Aug. 28.—William A. Quigley, a prosperous fruit farmer, living eight miles south of the city, was brutally murdered yesterday afternoon by two unknown villains. His wife left him for about a year, and yesterday the secretaries of the Grand Trunk Tunnel Company, and containing \$40,000 worth of goods.

SARITA, Aug. 29.—A large boarding house operated by the Grand Trunk Tunnel Company on the Canadian side of the big

was found in an unconscious condition, bleeding profusely and his clothing all torn off except his shirt. The victim survived at intervals long enough to tell his story. It appears that he was sleeping on a lounge, when he was suddenly attacked by two men, who dragged him to the shore and began pouncing him. This is the last he remembered. He had sold a house and lot in the city the day before and also a horse, and the money was before him in the bank and the murderers succeeded in getting that \$70. Mr. Quigley lingered in terrible agony until this noon, when he died. An examination of the body revealed frightful wounds in the abdomen, where the villains had stamped on him. There is no hope of capturing the murderers.

ON THE LAKE SHORE.

Serious Trouble Among the Chicago Switchmen.

Coming Meeting of the State Arbitration Board—Work Not Altogether Suspended on the N. Y. C.

CHICAGO, Ill., Aug. 28.—Twenty-seven switchmen in the employ of the Lake Shore road struck last night, completely tying up all the business of the road as far as Chicago is concerned. The trouble grows out of the stock yards difficulty.

Superintendent Amesen took a crew of men down to the stock yards yesterday afternoon. They were to be paid for the men quit and left their engines standing on the track. Some time afterward another crew was started, but it abandoned the strike at once. When the men quit, they learned that Superintendent Amesen had discharged all the men who had left their engines standing on the track.
