150 GUESTS IN PERIL

From Fire in a Boston Hotel-All But One Escaped Safely.

Boston, Feb. 27.-Fire in the upper part of the Bowdoin Square Hotel, early today threw 150 guests, mostly actors filling engagements at theatres, playhouses, into confusion, but all escaped safely except Mrs. Frank Barry, wife of the stage manager of the Howard Athenaeum. Mrs. Barry jumped from the fourth story of the hotel to a roof two stories below. She was unconscious when help reached her. It is thought she will recover. The flames were confined to the three upper stories of the building. Total loss about \$5,000. The theater sustained some damage.

NOW IT'S TILLMAN'S TURN TO SMILE.

Lieutenant-Governor of South Carolina Withdraws Invitation Sent to Roosevelt.

Augusta, Ga., Feb. 27.-Lieut.-Gov. James H. Tillman sent the following telegram to President Roosevelt: "A short time ago I had the honor to address your excellency a letter requesting that on the occasion of your visit to Charleston, you present a sword to Major Mich Jenkins, of the 1st United States Volunteer Cavalry, of whose gallant services you spoke so highly, your words being engraved on the scabbard. I am now requested by contributors to the sword fund to ask that you withdraw said acceptance."

(Signed) JAS. H. TILLMAN, Late Colonel 1st South Carolina Volunteer Infantry, and Lieutenant-Governor.

In explaining the sending of the telegram, Lieut.-Gov. Tillman said: "It is with much regret that I am directed, or rather required, to have sent the telegram I am especially in view of the fact that I am so closely related to one who but a few days ago was subjected to an affront which was seemingly, on the whole, the people who contributed to the purchase of the sword think, unwarranted."

Lieut.-Gov. Tillman is a nephew of Senator B. R. Tillman.

WILL NOT REPLY.

Washington, Feb. 27.-Although the White House is not making any official statement on the subject, there is reason to believe that no response whatever is likely to be made to the letter of Lieut.-Gov. Tillman, of South Carolina, requesting that the invitation to withdraw his acceptance of the sword be withdrawn.

President Roosevelt is not attending the Charleston Exposition.

WHY TILLMAN HIT McLAURIN.

The Washington Star offers a possible explanation of why Tillman swatted McLauren. A curious omission in the editorial connected with the senatorial election of Saturday, Saturday morning the blind chaplain, Rev. Mr. Milburn, was not present on the meeting of the senate at 11 o'clock, and the presiding officer called the senate to order and began the business of the day without the usual offering of prayer.

CAR SHUNTED INTO RAILROAD BUILDING

An Open Switch Responsible for Peculiar Accident.

Detroit, Feb. 27.-A peculiar accident happened at the Grand Trunk yards yesterday afternoon, when a coach that had been placed on the repair track was sent spinning through the offices of the Lake Shore and Michigan Southern Railway, almost demolishing the building. The entire office force was at work at the time, and the wonder is that some one was not hurt. The building is a two-story brick structure, and the entire side wall facing the Grand Trunk station was ripped out. The ceiling and floor of the building were torn loose, and huge timbers supporting them were smashed into splinters. An open switch leading to the repair track, was the cause of the accident, when an Engineer William Smith was backing his train up at an ordinary speed, when it took the open switch, strayed from the track, and ran into the building. The coach was standing on the repair track, and the impact sent the car crashing through the building, and into the offices. The coach was shunted into the building, and the entire office force was at work at the time, and the wonder is that some one was not hurt. The building is a two-story brick structure, and the entire side wall facing the Grand Trunk station was ripped out. The ceiling and floor of the building were torn loose, and huge timbers supporting them were smashed into splinters. The building is a two-story brick structure, and the entire side wall facing the Grand Trunk station was ripped out. The ceiling and floor of the building were torn loose, and huge timbers supporting them were smashed into splinters. An open switch leading to the repair track, was the cause of the accident, when an Engineer William Smith was backing his train up at an ordinary speed, when it took the open switch, strayed from the track, and ran into the building. The coach was standing on the repair track, and the impact sent the car crashing through the building, and into the offices. The coach was shunted into the building, and the entire office force was at work at the time, and the wonder is that some one was not hurt. The building is a two-story brick structure, and the entire side wall facing the Grand Trunk station was ripped out.
