

THE SAME OLD WAR CLOUD
HOVERS OVER THE BALKANSRupture Between Greece and Roumania Over Mal-
treatment of Greeks During Recent Riots.

Bucharest, Roumania, Sept. 23.—The diplomatic rupture between Greece and Roumania has been completed by the departure of the Roumanian minister from Athens. The interests of the Roumanians in Greece have been entrusted to Italy, while the Russian legation here will guard the interests of the Greeks in Roumania.

The cause of the trouble between

Roumania and Greece is the refusal of Roumania of the demand of Greece for compensation for the loss of Greek subjects during the recent demonstrations at Bucharest, and for satisfaction for the burning of the Greek flag by demonstrators at Gurgevo. The Greek Government also complained of the general insecurity of Greeks in Roumania.

ARTFUL-SYSONBY RACE OFF

Latter Is Sick and Great Thorough-
breds Will Not Meet.

New York, Sept. 23.—According to the Sun the proposed match race between Sysonby and Artful which was to have been run at Brighton Beach next Wednesday for a purse of \$15,000, has been declared off. Sysonby has been unexpectedly thrown out of training for the rest of the season because of the appearance of an eruption of the skin, commonly known as girth disease.

The disease generally makes its appearance on the belly where the saddle girths are tightest and consists of blotches of an angry nature. A horse thus afflicted must have a long rest in order to get the blood clot that it may be relieved of its impurities.

When Trainer Rogers learned of Sysonby's condition he made no further attempt to work Artful over the Brighton mile, but said that Mr. Whitney's great mare would positively be seen in both the cup preliminary next Tuesday, and the Brighton cup a week from today.

17 BORN ON TRAIN
TO MRS. MOCCASINLecturer Started With Forty
Snakes, But Found 57 in
Suit Cases.

New York, Sept. 23.—Raymond L. Ditmars, curator of the reptiles in the New York Zoological Garden in Bronx Park, delivered last evening a lecture on "Snakes and Their Habits," before the Men's Club of the Church of the Holy Faith, One Hundred and Sixty-sixth street and Trinity avenue. Assisted by Charles F. Snyder he carried 40 snakes, some of them deadly, with perfect safety on the Third Avenue L. road.

Each snake was packed in a stout canvas money bag and the 40 bags were packed in two dress suit cases. Little did the passengers think, etc. One by one the snakes were lifted out to illustrate the lecture. When Snyder opened a bag—stamped \$5,000—to take out a moccasin snake he found eighteen. "Mamma Moccasin," said Snyder, "is a very dangerous snake and seventeen youngsters, who were born on the journey from the garden to the church. The little chaps were from 6 to 8 inches long. The audience took more interest in them than in all the other 23."

After the lecture Mr. Ditmars had to show the seventeen little moccasins all over again. There were many girls and young women in the throng that crowded around the platform. A girl begged so hard for one that Mr. Ditmars yielded, and presto! he had to give away the entire lot.

Little moccasins are harmless. They feed on worms. They will die unless the girls tend them carefully. Most snakes are oviparous, hatching their young from eggs. The moccasin is viviparous, delivering its young alive.

SAYS M. P. WATT GAVE HIM £5
TO PUT WIFE OUT OF THE WAY

London, Sept. 22.—The hearing of the case of Hugh Watt, financier, and former member of Parliament, who is charged with having offered a bribe to a detective named Marshall to murder Mrs. Watt, was resumed today. James Skittle, an ex-convict, known as "Nosey," testified to meeting Watt in the Green Park in 1902.

Watt asked: "Have you done time?" Witness replied: "Three years for killing a woman," which was not true. Watt remarked: "All women are wicked." He then arranged with witness to go to a hotel and chloroform Mrs. Watt, and handed him £5, with which to procure chloroform and a

IRELAND AND THE EMPIRE

Redmond Says Colonies All Favor
Home Rule Idea.

New York, Sept. 23.—Wm. K. Redmond, M. P. for county Clare, Ireland, and brother of John Redmond, the Nationalist leader, is in this city on his way home from Australia. He went to Australia on a business trip, but has been occupied for most of his journey for furthering the cause of Irish nationalism. He will speak at Carnegie Hall Sunday night. Last night, with Mrs. Redmond, he was a guest at a reception given to him at the Hoffman House by the municipal council of the United Irish League. Mr. Redmond reported that he found a surprising sympathy for Ireland's cause in Australia, not only among Irishmen, but among the people of every church and nationality. The Australian Parliament since his visit has memorialized the British Parliament to grant political freedom to Ireland. With the sympathy of Canada already expressed, Ireland could well feel that the empire was behind her in her plea for justice. He knew no parallel in Ireland's history of subjugation in which the cause was in a better or more promising condition than it is today.

MARGARET ANGLIN'S HIT

Surrounded by Splendid Company
She Delights New Yorkers.

New York, Sept. 23.—At the Princess Theater last evening, and under the direction of Mr. Henry Miller, Miss Margaret Anglin, the Canadian actress, appeared in "Zira," a drama by Hartley Manners and Henry Miller, founded on Wilkie Collins' story, "The Moonstone."

The piece is really a melodrama, and one built on old-fashioned lines. The adapters of last night's production have made some good changes from the older version.

The role of Fether Trent is a strong and exciting one, and Miss Anglin played it last night with force and sincerity, and won in the effective scene of the third act one of the most genuine tributes of applause that have been awarded in a metropolitan theater in some time. The audience cheered her.

Keep Expenses Within
the Revenues.

[Special to The Advertiser.]
Ottawa, Sept. 23.—The Hon. H. R. Emmerson returned to the city at noon today from his trip over the Intercolonial Railway. At conferences with the chief officials, superintendents, train dispatchers and representatives of railway brotherhoods at Moncton, the minister talked over intercolonial matters principally. Mr. Emmerson made it clear to them that the country had become alarmed over the constantly recurring deficits, culminating last year in the shortage of \$2,000,000, and that unless this was changed the Government could not resist the agitation for transferring the road to a private company. It was imperative that the road should be made self-sustaining. It is understood that the heads of departments will co-operate with the minister in a programme of retrenchment and reform, so that the expenditure for working expenses at all events may be kept within the revenue. On the Prince Edward Island road it takes \$1 to earn 50 cents.

GREAT INLAND SEA FORMS

Imperial Valley, California, May
Soon Be Under Water.

Detroit, Sept. 23.—Disastrous results from irrigation in the Imperial Valley, in Southern California, were predicted last night by George I. Wesner, of Detroit, an engineer of national repute and a member of the International Waterways Commission. Mr. Wesner was speaking before the Detroit Engineering Society.

"Within twenty years thousands of people who have taken up government lands in the Imperial Valley will be driven out by water, their homes and fields forming the bottom of an immense inland sea," he said.

The cause of the coming catastrophe is poor engineering in diverting the course of the Colorado River for irrigation purposes. The river has cut into the banks of its new course to such an extent that nearly all of the Colorado River waters down into the valley. The engineers realize the danger, but after many frantic efforts have failed to change the river's course back to its old bed. Not for twenty years will the evaporation down there be equal to the inflow into the valley. By that time a million acres of the valley, which is from 60 to 250 feet below the level, will be covered by an inland sea.

MORE COMPLAINTS MADE

Street Watering Being Done in an
Unsatisfactory Manner.

Many complaints about the manner in which the street watering is being done are being received by City Engineer Graydon, and today the engineer told one of the inspectors that if he cannot attend to his duties in a more satisfactory manner he had better look for a new job. It is, Mr. Graydon's strict enough with the contractors, who appear to be doing the work any way but the right way.

MILLIONS CAN'T CURE HIM

Young Rockefeller Has Dyspepsia
and Will Retire From Business.

New York, Sept. 23.—According to the World today it is announced in a semi-official way that John D. Rockefeller will probably not return to the business world which he entered 20 years ago, 23 years of age, fresh from Brown University.

The younger Mr. Rockefeller is suffering from acute nervous dyspepsia, the World declares. It is a trouble that is inherited, partly, but its acute development began three years ago in an October rain, when Boxwood, the beautiful summer home of the elder Rockefeller, was destroyed by fire near Turrytown. John D. Rockefeller, jun., tried hard to save the property, and contracted a severe cold in the effort. The young man will sail soon for a winter abroad.

Those in confidential relations with young Mr. Rockefeller say that makes life of the wearing type that makes life a burden. He is known to suffer from nervous depression. The beginning of young Mr. Rockefeller's retirement from financial affairs was in May, 1903, when he resigned from the National City Bank, which he has not been able to get back to the desk at No. 26 Broadway.

PEACE MADE, SAYS WITTE,
TO ESCAPE THE SKEETERS

New York, Sept. 23.—A Paris dispatch to the World says that the senior Russian peace envoy, Mr. Witte, laughingly referred, while in Paris, to Professor Martien's experiences with American food, adding: "Can't say I suffered quite that way myself, but that may be due to my constitution. What I found nearly intolerable was the mosquitoes. We made peace in order to get rid of the mosquitoes. I understand now why the American national temperament is so very nervous. Americans suffer stoically one of the greatest torments known to human flesh."

Witte's pro-German declarations undoubtedly have widened the breach be-

tween France and Russia, and are bitterly resented by the Russian ambassador. Consequently Mr. Witte's reception was respectful, but lukewarm.

When questioned about the prospect of seeking to raise more money in France, he said: "I am no longer Minister of Finance, and am not even familiar with the details of the present situation. If a loan is to be negotiated in Paris, I know nothing about it."

After his audience with the Czar at Peterhof on Monday, Mr. Witte said: "Witte is going to one of the country districts in Russia to look after some property belonging to his son-in-law. He will then go to Italy to take a long rest."

This will make four assessors at work next week.

OPPOSITE SIDES OF LIFE

Contrasting Scenes Witnessed at
the G. T. R. Station.

For a few minutes this morning a scene presented itself at the Grand Trunk station, which, though not a very unusual one for the trainmen, showed two very opposite sides of life. The train bearing the Florodora Theatrical Company pulled in from the west and the merry members as they hurried off, presented an animated scene on the platform, previous to starting for their hotel.

Just a few feet away stood a party of 20 or 30 persons, all dressed in mourning, their faces pale with grief, mourning the loss of a dear friend. The flower-covered casket of the other side of the platform was a silent cause for this smaller assemblage. To an observer nearby the two contrasting parties preached, as it were, a brief sermon on the varying vicissitudes of life.

DOING WELL AT CAMP

London Field Battery Boys Make
Good Scores in Competitions.

The London Field Battery is having a most successful camp at Petawawa. Thursday the gun-boys were examined and they did well. Bombardiers Plewes, Charlton and Chamberlain made possible, and only one failed to make the necessary number of marks to qualify as a first-class gun-layer.

The battery fired yesterday, but were disqualified, as they omitted a very important test before firing three guns in the indirect series, viz., that of making a shot through the gun's obstacle (a hill) between the guns and target. As a matter of fact, the gunners would have hit the hill and lost their shot through premature explosions. The London boys are enjoying the outing.

MILITARY STORES BUILDING

Work on New Structure on Carling's
Heights Has Begun.

The new military stores building on Carling's Heights has been commenced. It will be a fine structure and will fill a long felt want.

The site of the building is in the southwest corner of the Heights, at the foot of the hill. It is just 25 feet north of the C. P. R. tracks and 50 feet east of Elizabeth street. The cost is estimated at between \$25,000 and \$30,000.

One great advantage of the new stores building is the nearness to the railway. It is expected that a siding will be put in, leading from the main line of the C. P. R. to the very doors of the building, so that stores sent from headquarters can be easily transferred from the cars.

The building will be so near the site of the annual camp that the labor of carting the tents and other camp materials into position will be greatly lessened.

Contractor Martyn has men at work excavating for the basement and the building will begin their work next week. It will take two months to complete the structure. It is to be built of white brick, faced with stone and with stone foundation. It will be two stories high and very commodious.

The building is to take the place of the old structure which has been used for so many years at the corner of Pall Mall and Waterloo streets. It will be 65 feet high, long by 47 feet 6 inches wide, with a wing 32 feet 6 inches
