PRICE TREND UPWARD ON NEW YORK MARKET

Street Experiences Another Collection of Moves in Special Stocks.

By STUART P. WEST.
Special to The Advertiser.
New York, Feb. 28.—Today's market was another collection of moves in special stocks, most of them upward. In the majority of cases the advance represented operations by pools formed to exploit a favorable earnings positions and the possibility

of increased dividends.

American Wool made a new high anticipating a satisfactory showing in the 1922 report, plus a favorable picture of the business prospects for 1923. The annual statement of American Hide and Leather, showing a surplus of over \$8 a share for the preferred stock, was better than the street had expected, and taken in conjunction with the further im-provement in the leather trade since the first of the new year, led to talk of an early resumption of dividends. Hide, preferred, ran up sharply

Baldwin easily regained its loss of the previous days, and Lima Locomo-tive sold above 70 again. The sugars did better, reflecting confidence that the recent check to the rise in sugar prices was nothing serious. American Can made a new high, and California Petroleum was again in demand. The preferred stock of the latter company crossed par for the first time on buying inspired by the reasoning that it was out of line with other industrial preferred shares with similar earning power and asset

The copper group as a whole was helped by the Anaconda dividend, al-though the immediate effect on Ana-

these two levels to also be opened up at once.

The significance of this may be gathered to some extent when it is considered that the recent annual report showed half a mile of drifting at the fourth and fifth level, with three-fourths of the years' drifting in ore.

It is also significant to note that, as the shaft nears the 1,000-foot nevel, the vein, which has been following close to the side of the shaft, has dipped slightly so as to bring it into the workings, covering the full width of the shaft without exposing one of its walls, and being composed of ore of excellent grade. grade.
With sinking operations completed,

With sinking operations completed, drifting will be carried east and west on various levels, and the indications are that the assured size of the mine will be greatly enlarged before the passing of many months. The ore zone courses its way for nearly three-quarters of a mile through the Wright-Hargreaves, thereby offering tremendous scope for development.

Senator Nathaniel Curry of Montreal has been made a member of the board of the Hattle Gold Mines. Senator Curry is chairman of the board of the Cana-dian Car and Foundry Company.

WALL STREET

Canadian Press Despatch.

New York, Feb. 28.—Noon. Virtually all sections of the list participated in the strong upward movement of the morning. Pool operations were actively conducted in a number of special stocks, sains of 2½ to 6 points being registered before noon by Porto Rican Tobacco, United Cigar Stores, Mathieson Alkali, United States Reality, United Retail Stores, Kresge, Postum Cereal and Steel and Tube, preferred. Fluctuations in the railroad shares were comparatively narrow. New high records for the year were established by virtually all the copper shares in response to the higher prices for the red mtal. Call money opened at 5 per cent.

SUGAR

New York, Feb. 27.—The raw sugar market was weak under increased selling pressure from operators, and Cubas were offered this morning at 4%, cost and freight, equal to 6.65c for centrifugal, of %c below the last paid price before the decline was checked, when there were sales of 25,000 bags of Cubas, prompt shipment.

The continued weakness in the spot market caused another heavy liquidating movement in raw sugar futures, coupled with considerable selling, said to be on foreign account, with prices at midday showing net declines of 22 to 31 points.

Within the next fifteen days the main three-compartment shaft on the Wright-Hargreaves Mine will conclude sinking operations for the present, and effort will be directed toward opening up the ore deposits at all levels down to that depth.

This will give the Wright-Hargreaves eight levels on which to operate, namely, at depths of 100, 200, 300, 400, 550 and 700 feet, already opened up, and with one cach at depths of 850 and 1,000 feet, these two levels to also be opened up at once.

The significance of this may be gathered to some extent when it is considered that the recent annual report showed half a mile of drifting at the fourth and fifth level, with three-fourths of the years' drifting in ore.

It is also significant to note that, as

had the advantage in the wheat market, especially after attention began to focus on crop conditions for winter wheat. Dry weather reports from Western Kansas were emphasized by assertions that west of a line drawn north and south through Kinsley the state had received practically no moisture since last July. Advices from Omaha said that owing to drought the Nebraska crop prospect was the poorest known for years past. Under such circumstances pit offerings here became meagre, and with demand increased the upward tendency of values encountered but little obstacle. Some bullish sentiment in addition was associated with predictions of speedy passage of farm credit bills, and with notice that animal feeds were bringing higher prices than human food grains, bran at Minneapolis being quoted at 1½e a pound, with rye a little less.

Corn and oats moved up with wheat. Cash prices: were emphasized by assertions that west
