working days. The same procedure is to be adopted with regard to armored cruis-ers. Not more than one at a time is to be detached from any squadron for refit. Af-ter four or lave years each ship will under-go No. 1 survey at the time of the usual repairs. This will take about two months, but if more time is required a special re-port is to be made to their Lordships. After eight or nine years each ship will undergo No. 2 survey (similar to the pres-ent No. 3 survey). This will take several months, and ships undergoing this survey will be paid off, their nucleus crews be-ing quartered in barracks. **BELTEFS**. The period during which ships will re-main in commission at sea is in future to be two years, instead of three years as heretofore. This will apply to all ships in commission at sea, and the system that has hitherto been in operation of keeping ships in home waters in permanent commis-sion, with periodical changes of a portion of the crew (as in the late Channel and Home fleets and cruiser squadron), is to be abolished. Consequent on the introduction of two years' commissions half the fleet in commission at set will be distributed

of two years' commissions halt the fleet in commission at set will be relieved an-nually and the reliefs will be distributed as evenly as possible throughout the year and between the three home ports. The principle of dividing the ships of the fleet and their aggregate crews equally between the three home ports will be maintained as hitherto. Ships of the Mediterranean and Atiantic fleets will return to England to recommission. Those on other foreign sta-tions will be relieved at some port about midway between England and their sta-tion. A DISGRACEFUL SCENE. **Blame** Laurier Elmira, N. Y., Dec. 30 .- A disgra Elmira, N. Y., Dec. 30.—A disgrace-ful scene was enacted in the common court chamber tonight when the coun-cll assembled for the final meeting. Alderman McGuigan charged Mayor Coleman with offering to buy gravel from a certain gravel pit for the city if \$1,000 was sent to him. The mayor indignantly oenied the charge and called the alderman to order. He told him to take his seat, and, the alderman per-sisting, the mayor called upon a police-man to remove him. The officer attempt-ed to obey, when others interfered. There was a mix-up and blow's were exchanged. At the command of the mayor, the officer desisted and the alder-man finally took his seat. Later war-rants were sworn out. For Naval Change

Garden City, England, Is Planned to Be an Idyllic Spot.

Bowery yesterday, Wm. K. Smith, pro-prietor of a Raines' law hotel, was ar-rested here tonicht on a warrant secured by District Attorney Jerome on the strength of a statement made to him by Cornelius J. Donlon, who said he saw the shot fired. O'Brien is a waiter who gave important testimony at the trial which resulted in the conviction of Patrolman Mallon for shooting Robt. Brennan last May. Yesterday morning he was found almost on the spot where Brennan was shot with a bullet in the abdomen. He is now in the hospital and it is thought he will die. Smith was taken before him tonight, but O'Brien refused to make any statement. Domlon told the district attorney that he saw Smith shoot O'Brien. He also said that he made this statement to two detectives, who failed to make an ar-rest. Mr. Jerome has summoned the de-tectives to appear at his office tomor-row to explain their action. Be an Idyllic Spot. An industrial town unlike any other in the world is about to rise near Lon-don. It is to be called Garden City, be-cause every house will be surrounded by a garden. Ebenezer Howard is the projector of this Utopia and he has, after many years, induced rich philan-thronists to form a stock company, and furnish the large capital necessary to begin work. There is to be one family to each house, flats and two-family houses being absolutely barred; the total population is not to exceed 30,000 and a maximum of oue-sixth of the town area is to be given up to buildings. There are to be factories, but every window of these is to be a window-garden. Meat is to be supplied direct from the surrounding farms: each family is to grow 'its own vegetables on its own land; cows are to be pastured in the town and each house is to be hygienic and pretty. Gaiden City is to be governed by a board of managers and is to be managed strictly as a business enterprise. There is noth-ing socialistic about it and the residents will have little to say about the govern-ment of the place. The resident such to scatter such
