look for very active markets and big specular tions.

J. J. Dixon & Co.'s correspondents: Wheat opened active and ic higher influenced by public cable quotations. Private advices from Liverpoo denoted an easier feeling and a tendency to duliness in tone, which induced considerable local selling. Receipts at western points were liberal and receiving houses held selling orders for early arrivals. The leading futures declined 2½c rapidly, but met resting orders with the late buil houses to take back wheat sold two days ago. These purchases were very large whenever December wheat was below \$1.02 and appeared to be a continuation of the policy pursued here today. Towards the close the Atlantic seaboard reported some \$00.000 bushels clearances and a large amount of purchases to-day on new business for foreign account, which caused a rush of buying and closed the market at high point.

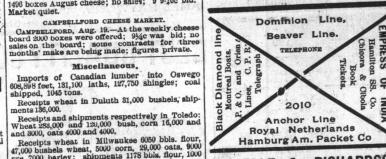

Corn was active, excited and higher on the demand to cover short contracts. Oats were inherently weak under pressure of sales for country account. DOUBLE TRIPS. Str. EMPRESS OF INDIA St. Catharines, Niagara Falls, Buffalo, Rochester and New York

GRATEFUL-COMFORTING

BREAKFAST. "By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Coosa, Mr. Epps has provided our breakfast tables with a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hunareds of subternaladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—Civil Service Gazette.

Made simply with boiling water or milk. Sold only in packets by Grocers, labelled thus:

IAMES EPPS & CO.. Homeonathic Chemists. JAMES EPPS & CO., Homosopathic Chemists, London England.
