BABY MOSS.

"Owes her robust health to Virol."

Cranford, 50, St. Albans road, Mosely, Birmingham. Aug. 20, 1920.

Enclosed you will find photograph of my daughter at 17 months old.

I think you will agree that she is a splendid testimony to the value of Virol as a baby food. From early days Virol has been added to her milk food, and I am quite sure that she owes her robust health to this addition.

I have many times recommended Virol and in every case there has been improvement in general health, rapid growth and easy assimilation of food.

Believe me to be, Yours faithfully, (Signed) Geo. Moss.

Virol is used in large quantities in more than 5,000 Hospitals and Infant Clinics. It is invaluable for the expectant and nursing mother herself, whilst for children it supplies these vital principles that are destroyed in the sterilization of milk: it is also a bone and tissue-building food of immense value. Virol helps to form firm flesh, strong bones and good colour.

CHAPTER XIV.—ENGLAND AT LAST.

"I wonder when I shall see you again," said the freckle-faced boy merrily.

It was a week later, and he was standing on deck with Roy, looking towards the coastline, which was gradually taking shape and definite form out of the early morning mist.

Roy shivered a little and snuggled her chin more closely into the fur collar of a big coat she wore.

She looked very pale, and there was a sort of scared look in her eyes as she momentarily raised them to the boy's face.

"I don't suppose you'll ever see me again," she said. "Why should you?" He flushed and bit his lip.

Mrs. Edith Anderson and Mr. W. B. Beamer, the latter president of Arts '23.

Miss Louise Duffield, Queen's avenue, was the hostess yesterday of a jolly afternoon bridge of six tables for the girls of the younger set. Mrs. J. C. Duffield presided over the tea table, which was centered with a charming array of hyacinths, roses and tulips, in a color scheme of yellow, mauve and pink.

McFarlane, Miss Elizabeth Ross and Miss Della Hutchinson, the latter, who is president of the alumnae, coming up from Toronto, where she is assistant superintendent at Wellesley Hospital, to enjoy the dance. Mrs. Walter Cunningham, Miss Agnes Mallock and Mrs. A. C. Joseph, alumnae officers, also received, and the admirable arrangements were in the hands of Miss Gladys Thompson, Miss Rowe and Miss Ashplant. The many guests included a large number of city medical men, with their wives, and members of the medical board, as well as a great many alumnae members from out of town.

The wide gym of the new Medical School was the scene last night of another jolly entertainment, the dance given by the Victoria Hospital Nurses' Alumnae Association, to aid in raising their \$1,000 objective for the Memorial Children's Hospital. The alumnae colors, purple and gold, were cleverly introduced into the decorations, backed by palms and ferns, and the Bonnie Hart orchestra provided a delightful dance music. Patrons and patronesses for the dance, who also assisted in welcoming the guests, were Dean and Mrs. Paul McKibbin, Dr. and Mrs. D. C. CHAPTER XIV.—ENGLAND AT LAST.

"I wonder when I shall see you again," said the freckle-faced boy merrily.

It was a week later, and he was standing on deck with Roy, looking towards the coastline, which was gradually taking shape and definite form out of the early morning mist.

Roy shivered a little and snuggled her chin more closely into the fur collar of a big coat she wore.

She looked very pale, and there was a sort of scared look in her eyes as she momentarily raised them to the boy's face.

"I don't suppose you'll ever see me again," she said. "Why should you?" He flushed and bit his lip.

"I thought perhaps—we've been such pals—I hoped—" he stammered. She laughed.

"It will be much better for you if we never meet again," she said, with sudden softening. "You're such a boy, and I—"

She shrugged her shoulders and glanced across to where sturdy Rayner stood, leaning over the side of the ship, staring morosely landwards.

Just ordinary acquaintances, that's what they were now, he and she. For a whole week he had treated her as he treated all the other women on the boat; for a whole week he had behaved as if he had never said he loved her, never asked her to marry him.

"But I am glad I refused," she told herself fiercely now, as she looked at his stern profile. "It wasn't enough that he just loved me, though perhaps I don't deserve any more."

With sudden impulse she moved over to where he was standing.

"You don't look particularly pleased to see your little island," she said with faint irony.

He did not turn.
