 JACKSON, Prop'r.

Must Sell Good Hogs.

The following notice has been sent to
 all the hog buyers—
 Dear Sirs.—All the Packing Houses
 are now under strict Government inspection
 and we therefore hereby draw your
 attention to the fact that all hogs suffering
 from the following apparent diseases
 or defects will be condemned on arrival—

Hog Cholera or Swine Plague, Mange
 or Scab, Uremia and Sexual odor.
 This includes boars.
 Hogs showing any disease or injury,
 which causes considerable elevation of
 temperature.
 Bruises and Abscesses, Emaciation, Preg-
 nancy, Immaturity.

We want you to use the greatest care
 when you receive hogs and to subject
 every lot of hogs to close inspection. If
 you find anything wrong tell the farmer
 at once and show it to him and do not
 pay him for any such hogs until you have
 our report as to whether it has been pas-
 sed or not by the Government Inspector.
 We trust you will closely follow these
 instructions as they are of the utmost im-
 portance.

Yours truly,
 The Canadian Packing Co.,
 London, Ont.

Nerveless Women
 No Animation,
 Lack Endurance,
 Weak, Unstrung, Tired.
 Ferrozone Will Cure.

For sick women no remedy exists that
 uplifts like Ferrozone.
 No remedy exists so profound an influence
 upon the functions that supply clearness of
 skin, brightness of eye, elasticity of spirit,
 abundance of strength.

Ferrozone is a marvellous former of blood
 —rich, red, nutritious blood, the kind that
 circulates life and activity to every organ
 in the body.

Baunancy, vigor and vim are restored,
 —to the nerves is given vitality, to weak
 places is strength lent.

Wonderful power in Ferrozone, and any
 weak, pallid woman can be quickly nourish-
 ed back to joyous health if Ferrozone is
 used.

Won't you try Ferrozone?
 It will cure you just as it did Mrs.
 Abram Carley, of Stratford, P. O., Ont.—
 who says: "I consider that I should recom-
 mend this preparation because I have
 proved it is simply wonderful in building
 up. I was all run down, suffered from an
 extremely nervous and unstrung condition.
 My sleep was broken and didn't rest me as
 it should. My appetite was fickle and only
 certain food appealed to me. My color was
 dull and I looked sick. Ferrozone gave me
 a splendid appetite,—I grew stronger day
 by day. My nervousness and apprehensions
 disappeared. Ferrozone has given me ab-
 solute, strong health and I recommend it
 highly."

No tonic is more effective. Absolutely
 safe for women, girls and even children,
 good wherever there is weakness, debility,
 nervousness or ill health. Try Ferrozone,
 50c. per box at all druggists.

The Pay of Revivalists.

Successful revivalists get big pay now-
 adays. According to the American Mag-
 azine, "Billy" Sunday received \$3,600 for
 a few weeks' work in Fairfield, Ia. "I
 think that the people who work for
 Christ ought to be enabled to live as
 well as those who work for the devil,"
 says Sunday. The Rev. Mr. Lyon, who
 held meetings for a month in Oberlin, O.,
 stipulated that he was to receive no pay
 except that which was freely given to
 him at the first three meetings. The
 contributions taken for his benefit yielded
 him \$1,800, which is as much as the
 average Oberlin professor receives for a
 year's work.

Danger in Corn Salves.

They usually contain acids and burn the
 flesh. The one safe cure in liquid form is
 Patnam's Painless Corn Extractor, which is
 purely vegetable, causes no pain and cures
 in one day. Don't forget the name—"Pat-
 nam's."

The wiring for the electrification of the
 St. Clair tunnel is nearing completion
 and most of the experts employed will
 return to their homes in Pittsburgh this
 week.

ITCH, Mange, Prairie Scratches, Bar-
 ber's Itch and every form of contagious Itch
 on human or animal cured in thirty minutes
 by Wolford's Sanitary Lotion. It never
 fails.

There has been a large number of cases
 of horse stealing throughout Western
 Ontario during the past six weeks. In
 all cases the horses have been recovered
 and in the majority of cases the thief ap-
 prehended and sentenced.

WILSON'S FLY PADS
 One packet has actually killed a bushel of flies.
 —SOLD BY—
 DRUGGISTS, GROCERS AND GENERAL STORES
 10c. per packet, or 5 packets for 25c.
 —will last a whole season.

BY-LAW NO. 10, 1907
OF TOWNSHIP OF WARWICK.

A By-law to provide for drainage work in
 the Township of Warwick in the County
 of Lambton and for borrowing on the
 credit of the municipality the sum of
 Eight Hundred and Fifty Five Dollars,
 the portion to be contributed by the said
 municipality for completing the same.
 Provisionally adopted the 2nd day of
 September, 1907.

Whereas, Duncan McGill, one of the
 parties interested in and assessed for the
 construction of the Higgins Local Drain,
 has petitioned the Council of the said
 Township of Warwick to have the said drain
 cleaned out and put in a proper state of
 repair;

And whereas, thereupon the said Council
 has procured an examination to be made by
 C. A. Jones, being a person competent for
 such purpose, of the said area proposed to
 be drained and the means suggested for the
 drainage thereof, and of other lands and
 roads liable to assessment under the Municipal
 Drainage Act, and has also procured
 plans, specifications and estimates of the
 drainage work to be made by the said C. A.
 Jones, and an assessment to be made by
 him of the lands and roads to be benefited
 by such drainage work and of other lands
 and roads liable for contribution thereto,
 stating as nearly as he can the proportion
 of benefit, outlet liability and injurious
 liability, which in his opinion will be de-
 rived or incurred in consequence of such
 drainage work, by every road and lot or
 portion of lot, the said assessment so made
 being the assessment thereon by this
 By-law enacted to be assessed and levied
 upon the roads and lots or parts of lots
 hereinafter in that behalf specially set forth
 and described; and the report of the said
 C. A. Jones in respect thereof and of the
 said drainage work being as follows:—

Petrolia, June 24th, 1907.
 To the Municipal Council, Township of Warwick.
 GENTLEMEN:—In compliance with instructions
 received from your Honorable Body I have made an
 examination of the Higgins Drain, lots 2 to 11, in-
 clusion 8, S. E. R., of your Township and find the
 same considerably out of repair, more particularly
 the portion on the west 1/2 and east 1/2 lot 6, where
 it is evidently trapped in more than elsewhere by
 encroaching on these lots.

I would recommend that it be repaired from
 the centre of lot 11 to its junction on lot 2, with
 the exception of the portion through the work on lot
 2 which will be removed by the work on lot
 2 which will be removed by the work on lot 2,
 consisting in it on this lot. The work on lot 3,
 particularly the west half will also be very light-
 ly and principally of levelling the bottom and
 making it an even grade.

The bottom width will be 4 ft. from the head to
 in stations of 2 chains or 8 rods each, commencing
 with stake 10 or near the line between the east
 and west halves of lot No. 11, the portions from 9
 to 10 on the east 1/2 of said lot being in my opinion
 deep enough and wide enough as it now is.

The bottom width will be 4 ft. from the head to
 \$100, which is 44 rods east of the 6-7 side road
 and from 160 to the outlet it will be 6 ft. This is 1 ft.
 wider than when last repaired but as it can be made
 this width now without interfering with the sides
 and yet making the side slopes 1 horizontal to 1
 vertical I deem it advisable to do so.

I have prepared a plan of the locality, profile of
 the drain, estimate of cost and specification of the
 work together with schedule of assessment on the
 lands affected, all in triplicate, one copy being for
 service on the Municipality of Brooke, and one for
 the Grand Trunk Railway Co., all of which I herewith
 submit.

Following is my estimate of the cost of the pro-
 posed work:—

Excavating at 10 to 172, 648 rods at 45 cts per rod.....	\$291 00
Excavating at 172 to 202, 120 rods at 94c per rod.....	112 80
Excavating at 202 to 272, 280 rods at 70c per rod.....	196 00
Excavating at 272 to 286, 96 rods at 20c per rod.....	19 20
Removing driftwood at 286 to 307 1/2 at junction 5 00	
Building culvert on 6-7 side road, 10 ft. in clear 60 00	
30 ft. long.....	55 00
Registering by-law.....	2 00
Clerk's fees.....	10 00
Printing by-law Township of Warwick.....	3 00
Registering by-law.....	2 00
Clerk's fees.....	6 00
Setting and inspecting work.....	25 00
Survey, plan, profile and report in triplicate.....	90 25
Assistance on survey.....	9 15
Total estimated cost of work.....	\$802 00

SPECIFICATIONS OF WORK.
 The drain is to be deepened to the depths and
 dimensions shown and figured on the accompanying
 profile. The bottom to be made an even grade be-

tween stakes and the sides sloped 1 horizontal to 1
 vertical but the present banks are not to be dis-
 turbed. Should any error appear in the figured
 depth at any station the grade is nevertheless to be
 made to conform with that shown on the profile.
 The depth of the drain is from the ground beside
 the stake on the side next the drain. The depths
 figured on profile below the grade line represent ap-
 proximately the amount of deepening opposite each
 stake.

The earth from the excavation is to be cast about
 equally on each side of the drain where there is no
 fence constructed along one side thereof and where
 there is a fence so constructed the earth is all to be
 cast to the side opposite the fence and in all cases at
 least 2 ft. clear of the edge.
 Any fences the contractor may require to take
 down in the prosecution of the work shall be replaced
 by him as soon as that portion of the drain is com-
 pleted.

Remove all logs or driftwood from the drain be-
 tween stations 590 and 307, through which portion
 there is no excavation.
 Build a culvert on the 6-7 side road over the drain
 to be 10 ft. wide in the clear and 20 ft. long, to be at
 least 9 inches higher than the present one, to have
 7 posts on each side placed at 3 ft. centres, sunk at
 least 2 ft. below the bottom of the drain as complet-
 ed, to be at least 8 inches diameter at the small end,
 4 1/2 inches at the large end, to be galvanized iron
 the inner face of the posts at the top and well spiked
 thereto. Stringers to be 2 inches by 14 inches by 12
 feet long and covered with 3 inch plank, the
 posts to be backed on the outside with 2 inch elm or
 hemlock plank the full depth of the drain.

A similar culvert to the above, only 3 ft. wide in
 the clear instead of 10 ft. to be built over the drain
 on the 10 side road.
 Your obedient servant,
 I have the honor to remain,
 C. A. Jones, O. L. S. & C. E.
