

obstacles of this nature, no doubt exists, and it is not at all unlikely that those very people who have been the prime movers in an endeavour to hamper and embarrass its promoters will derive the greatest benefits from the advantages and accommodation the railway will afford.

READ THIS!

(From the Chicago Mining Review.)

The chief factor in the development of the mining industry of any locality is the unappreciated and usually poorly sustained local paper. The true value of mining claims, the advantage to capitalists, the rich strikes of well conducted properties all fail of their legitimate influence if the fact is not made known outside of the narrow circle of isolated localities. As important as is the local and special press to the mining interests, it has been proven in a thousand cases, no other business expects so much or pays so little to the very right arm of its success. Papers that have earnestly and faithfully laboured to attract the attention of capital and to build up on a permanent basis the mining industry of a camp, have been left to starve and die in the place that they have done so much to establish. No other business expects gratuitous advertising, and it is a short-sighted policy for publishers and mining companies to neglect the best, and in many instances the only means that can be used to advance the interests of the camp and industry.

Subscribers to the CANADIAN MINING REVIEW are not as numerous as they might be, and correspondents are not prompt in reporting progress at the mines. We look for reform in both particulars. [Ed.]
