

THE ANÆMIAS

yield readily to organic, or true animal iron treatment.

A resort to *inorganic* iron preparations or tonics, serves only to stimulate corpuscular proliferation without supplying sufficient nutrition to mature the blood cells.

A preparation of **TRUE ANIMAL IRON** that will supply every deficiency in the blood, and assure the proliferation of *all* the corpuscles to a full and sturdy maturity, is found in

BOVININE

It contains **10% ANIMAL IRON**, **20%** coagulable albumen, and every element of nutrition of the animal, mineral, and vegetable kingdoms.

It is readily absorbed by the tissues, requires little or no digestion, is prompt and reliable in stimulation and support, and is a nutrient of the very highest value.

BOVININE administration causes quick increase of the leucocytes, and a consequent arrest of all pathological processes.

BOVININE is advertised to the Profession only, and is a strictly ethical physician's preparation. Its formula is open to all.

A postal request brings you our Hand-book on Haemotherapy, giving valuable information to both the general practitioner and the specialist.
