CHLORODYNE

Has now obtained such universal celebrity as a remedial agent, it can scarcely be considered a specialty, its essential composition being known to most European practitioners.

It may be administered in almost any fluid or on sugar. Sold in 1, 3, 3, and 8 oz. bottles, and in bulk for dispensing.

Many of the Chlorodynes of commerce are not of uniform strength, and vary in their effect, which has induced MORSON & SON to compound this preparation to remedy these defects.

The dose for an adult is from 10 to 20 drops (and 1 minim is equal to 2 drops); the dose may, however, be increased in special cases to 25 or even 30 minims, but it is best to commence with the lesser dose.

MORSON'S PREPARATIONS are sold by all Chemists and Druggists throughout the world.

ALL IS NOT GOLD THAT GLITTERS, is the old proverb. If it be true generally, it is specially so of the "Gold Chain" trade. Much of the chain made in Birmingham "for export" might more truthfully be called "copper alloy" than gold, for almost three-fourths of it is base metal. Our

STANDARD GOLD CHAINS

are all made of sufficient fineness to resist nitric acid, and not to tarnish in wear, each part being polished to the highest bright-burnished surface. Our COLOURED CHAINS

Are Coloured by the Acid Process.

(not gilt), and can all be relied on as a standard of fineness. To prevent deception, we stamp each chain R. W. & Co. on the swivel, without which mark we do not guarantee any chain. To be had of all Jewellers.
