

MRS. PICKERING, of Brantford, Ont., is now too well known to the medical profession as a manufacturer of abdominal supporters to require more than passing mention. Mrs. Pickering has for years been engaged in this class of work, and she can count amongst her patients many of the best people of Canada. She has in the past been widely patronized by medical men, and the mere fact that she will not use anything but the best materials in her supporters should make her worthy of even greater patronage in the future.

TREATMENT OF PRURITUS VULVAE—P. Ruge (*Berlin. klin. Woch.*) insists on the importance of asepsis of the genital organs (vulva, vagina, and cervix uteri) in the treatment of this form of pruritus. All the accessible parts should be thoroughly washed with soap and a solution of

corrosive sublimate applied as long as may be necessary for complete disinfection. Carbolyzed vaseline (3 to 5 per cent.) is then smeared over the affected parts. The washing must be repeated every three or four days. By means of this treatment Ruge has effected permanent cure even in pregnant women and in elderly persons. He finds the same method successful in cases of acute vaginitis with profuse discharge. In this condition the washings and the sublimate applications are repeated daily.—*Brit. Med. Jour.*

MADE HIM WEARY.—Perry Patetic—"Gee whiz! This here paper says the blood in a man's body travels more'n 60,000 miles in a year." Way-worn Watson—"Wot did you g an' tell me that fer? Ain't I tired enough already?"—*Cincinnati Enquirer.*

THE AMERICAN PEDIATRIC SOCIETY

RECOMMENDS

THE USE OF

ANTITOXIN

of "The most concentrated strength of an absolutely reliable preparation"

Tests made by the Bacteriologist of Pennsylvania State Board of Health, (report published in "Public Health," July, 1896,) shows Mulford's Antitoxin to be thoroughly reliable and the most concentrated.

FORTY THOUSAND CASES

LESS THAN 5% DEATHS.... OF DIPHTHERIA.

Is the record of over ten thousand physicians in general practice, with Mulford's Antitoxin.

Mulford's Antitoxin is Supplied in Sterilized Glass-Stoppered Vials, as follows:

"Standard" No. 1, (100 units to each cc.) in vials of 500 units, \$1.00; No. 2, 1000 units, \$1.75; No. 3, 2000 units, \$3.25
 "Potent" No. 1, (250 units to each cc.) in vials of 500 units, \$1.25; No. 2, 1000 units, \$2.25; No. 3, 2000 units, \$4.00
 "Extra Potent" No. 1, (500 units to each cc.) in vials of 500 units, \$1.50; No. 2, 1000 units, \$2.75; No. 3, 2000 units, \$5.00

Special Syringes for Antitoxin injection.

The latest treatise on Diphtheria will be forwarded free upon application.
