WAINWRIGHT NATIONAL PARK

INQUIRY AS TO DESTRUCTION OF BUFFALO, ELK,
MOOSE AND DEER

On the orders of the day:

Hon. GEORGE BLACK (Yukon): A report appears in the *Ottawa Journal* of this morning to the effect that the government has had destroyed 3,000 buffalo, more than 1,000 elk, 500 moose and 500 deer which had been in Wainwright national park. Is that report correct? If so, why were the elk, moose and deer not released to form an addition to the wild life of Canada?

Hon. T. A. CRERAR (Minister of Mines and Resources): The report is correct. The buffalo, elk, moose and deer which were in Wainwright national park were destroyed some months ago. I did not get the last part of my hon. friend's question.

Mr. BLACK (Yukon): I asked why the elk, moose and deer had not been released. I can quite understand why the buffalo or bison should be destroyed, but the moose and deer are natural to Canadian wild life and I should like to know why they were not released.

Mr. CRERAR: An opportunity was given to various public bodies possessing parks or other facilities to secure any of these animals they might wish before the destruction took place. The destruction of the animals in Wainwright national park was made necessary by the fact that they were badly infected
