and prices moved upward briskly. Activity decreased later, but stocks were sustained on a substantially higher level until the closing hour, when the market wold off. A significant feature of the movement was its breadth. Many of the minor stocks, which usually are not prominent in speculation, came to the front and scored large gains. Shares of the independent steel companies and the oil, fertilizer and equipment issues were strong. Some of the leading issues lost all their gains in the reaction of the last hour, but the specialties held up well. Sentiment was more cheerful. The lower rates for money and Saturday's expectedly strong bank statement indicated improvement in the monetary position. Steel trade reports were better, in respect of both prices and volume of incoming business. Buying for London account also helped on the upward movement. The foreign demand was centred in steel dealings in which made up the bulk of a total of about 12,000 shares.

Oil Stocks Strong.

Texas Company continued the spectacular advance which brought it into prominence last week, adding seven points to the high price of Saturday, Mexican Petroleum jumped nearly nine points. New Haven was bid up two points in response to the announcement from Washington of an agreement between the aborney-general and the company for partial dissolution of the system.

The payment of a little over \$235,000, due
to Alexander Macdonald, on Dec. 15, by
the A. Macdonald Co., Limited, purchasers of the A. Macdonald Co. business,
was arranged on Saturday. The new
firm on that day paid to Mr. Macdonald took

value of the difference. "This," said Mr.
Macdonald, "completes the balance of the
cash payment with the exception of \$300,000, which we have agreed to carry one,

This is the payment which a number
of financial and eastern dailies said had
been made some time ago. The statement was erroneous, as the money was
