

Grand Diet of Worms

DISSOLVED BY

Watson's Scholedion,

WHICH IS

Offered to the public as a perfectly safe, pleasant and efficacious
EXPPELLER of WORMS from the human system.

As this preparation contains no mineral ingredient, the administration of it to young children is not followed by the dangerous, and—in many cases—fatal consequences resulting from the use of many of the Vermifuges at present before the public.

A compliance with the directions accompanying this, will prove that it deserves the character claimed for it above; while the promptness and painless character of its action render it the cheapest and safest remedy for worms hitherto discovered.

To be given at night on going to bed, and on getting up in the morning, fasting for three hours after. Two or four doses, according to symptoms, will ENTIRELY eradicate every species of worms.

Charlottetown, 21st September, 1869.

W. R. Watson, Esq., has informed me of the composition of his "Worm Candy," and I can unhesitatingly recommend it as a safe and efficacious vermifuge.

JAMES N. FRASER, M.D., L.R.C.S., Ed.

Having prescribed "Watson's Scholedion" in a large number of cases, in which worms were indicated, we have very much pleasure in stating that we consider it a very safe and efficient form of Anthelmintic.

Messrs. JENKINS & BRINE,
Physicians and Surgeons.

Charlottetown, Sept. 22, 1869.

Summerside, August 10, 1869.

DEAR SIR:—I shall feel obliged by your making known, for the benefit of others, my opinion of your "Scholedion." The use of it in the case of my infant child has satisfied me that it not only merits the character claimed for it in your advertisement, but also that the advertisement does not do adequate justice to a most valuable remedy.

Yours truly,

WM. M. HOWE.

WM. WATSON, Esq., Queen Street, Charlottetown.

W. R. WATSON.
