**It is acceptable to palate and stomach.**

**Sufficiently potent** to insure decided benefit, yet harmless, howsoever long its use may be continued. This characteristic is possessed by no other remedy.

**It assists digestion** and assimilation.

**It vitalizes the Blood**, supplying such ingredients as may be required.

**It restores tone** to the nerves.

**It gives power** of endurance and of concentration to the mind.

**It promotes vigor** in the organs which depend for health on the involuntary muscular action, viz.: the Liver, Lungs, Heart, Stomach and Genitals.

And, unless afflicted with some disease involving **ABSOLUTE ORGANIC LOSS**, it will sustain the system until it reaches the age allotted to man by a beneficent Creator.

**No person** will be disappointed in the effect of **FELLOWS' HYPOPHOSPHITES**, who rigidly follows the directions.

## FELLOWS' HYPOPHOSPHITES.

### INCEPTION.

The experiments which perfected this preparation occupied many months, and were instituted with a view to curing that insidious disease,

### TUBERCULAR CONSUMPTION,

and in order to supply the deficiencies in Hypophosphites already in use; for, although their nature was correct as to *theory*, their preparations were, owing to their imperfect organization, found wanting in practice.

While they caused the formation of fat and generated heat, they did not improve the blood. The tonic effect upon the nerves and muscles was circumscribed, and, owing to their diluted state, involving large doses, they were also too expensive.

The desiderata sought by Mr. Fellows, were:

A convenient, palatable remedy;

Unalterable by time;

Harmless, though used continuously, yet might be discontinued at any time without any ill effect;

perience of the benefit derived from its use.

The most marked was a case which was under my care in March last. This was a patient who had been under treatment nine months with no beneficial results. When I first saw him he was so feeble that he could not sit up long enough to have his heart and lungs examined. What disease he had been treated for did not appear, but I found him suffering under *chronic splenitis*. He had a severe cough, dyspnoea, palpitation of the heart, impaired digestion, and consequent general emaciation. I put him under treatment, and in a few weeks he was able to move about a little; but still the debility continued. I then prescribed your Compound Syrup of Hypophosphites; and, after using four bottles, he was able to attend to his farm, and is now perfectly well. In March he was given up by four physicians respectively; in May he assisted in plowing eighteen acres of land, and had run up in flesh from a hundred and thirty-six to a hundred and forty-eight pounds' weight.

I send you this for the purpose of making what use you please of it, and wish you all success in your labor for the benefit of suffering humanity.

Strongly recommending the use of your Compound Syrup of Hypophosphites to all who suffer in any way from disease or weakness of the lungs, bronchial tubes, or general debility,

Believe me,

Your ob't serv't,

J. H. W. SCOTT, M.D.
