

THE PROPER Trinity Medical College.

comfort and convenience of the large and constantly increasing number of students in attendance. To meet the requirements of the very large Anatomy classes, a new Dissecting Room—very spacious, also lighted from ceiling, and which, for SANITARY REASONS, is entirely separate from the rest of the College Building, has been recently built. It is furnished with every modern requisite of a Dissecting Room.

Trinity Medical College, as is now well known, is an independent Corporation, entirely separate and distinct from every other. Under its SPECIAL act of incorporation the College is empowered to enter into affiliation with any "University or Universities" with which it may be desirable, in the interests of the students, to have it connected. The College therefore rests on the broadest possible basis, and is in affiliation with

The University of Trinity College,
The University of Toronto,
Queen's University,
Victoria University,
The University of Manitoba.

Students attending Trinity Medical College have thus every advantage which University connections afford, under which they can, by conforming to the curriculum laid down by the several Universities named, go up for their degree, before any one, or more of these. And in addition, they can, if they desire to do so, present themselves for the "Trinity Medical College" Examinations, as laid down in this announcement (see pages 9, 18, 19), which are equivalent in every way to those required for University Degrees in Medicine, and if successful, obtain the "Fellowship by Examination" diploma. This qualification is fully recognized, separately and conjointly, by the several Examining Royal Colleges of Physicians and Surgeons in Great Britain. Under its special act, this College is represented on the College of Physicians and Surgeons of Ontario, and has therefore every privilege enjoyed by any medical teaching body in the Dominion.

The "Fellowship by Examination" Diploma entitles its holders to go up before the Royal Colleges of Surgeons and Physicians in Great Britain, with precisely the same exemptions from various parts of the examinations as are allowed to holders of University Degrees.

Full instruction is given in Trinity Medical College in all the subjects required for degrees in Medicine, by the University of Toronto, including Biology and Comparative Anatomy.
