Serbia in Grip of Worst Scourge of Modern Times

TYPHOID PREVALENT, TOO

Typhus Was Brought to Serbia by Consignment of Austrian Prisoners Who Numbered 60,000

New York, March 30.—Serbia is in the grip of an epidemic of typhus more virulent and attended by greater fatality than the world in modern times has ever been called upon to combat, according to Henry James, Jr., of the War Relief Commission of the Rockefeller Foundation, who arrived here tonight on the steamer Lusitania from Liverpool.

Mr. James, accompanied by Ernest P. Bicknell, national director of the American Red Cross, also a member of the commission, were in Serbia from February 19 to February 26. They made careful investigation of the conditions and Mr. James intimated that he will in his report make the strongest recommendations for every possible measure for the relief of the stricken country.

"The epidemic of typhus," said Mr. James, "was brought into Serbia presumably with the first great consignment of Austrian prisoners, said to number about 60,000. Serbia being a small country was not prepared adequately to handle such an immense body of men."

As a result they were distributed among the population wherever they could be taken care of. This caused over-crowding and unsanitary conditions, which are highly conducive to the spread of typhus.

Mr. Bicknell and myself visited Nish, Belgrade and other large centres of population. The epidemic was well under way in all these centres when we arrived and it is probably prevalent throughout the country.

"Indicative of the seriousness of the epidemic," said Mr. James, "is the fact that in the city of Nish, where I was, the death rate was 100 per cent."
