

## PRESIDENT'S MESSAGE

*As President of the student body for the past year, I want to wish each member of that body every success in the years to come. I also take this opportunity, on behalf of my class, to express sincere thanks to all members of the faculty, who guided and inspired us, and took a personal interest in each one of us, both in and out of the lecture halls. I would like to express my personal appreciation to the other members of the S. R. C., and to all the students who unselfishly worked in the interests of the school to make this the successful and interesting year it has been.*

*This year our institution took a large step towards full University status with the addition of second year classes in Arts and Education. It is with a certain sadness that we look back upon the loss of Junior College traditions and customs; but this sadness is far outweighed by optimism in the promise of a bright future. Soon the University will move to a new location, with shiny new buildings, as is only fitting for a new campus; but for us, the old red brick buildings, steeped in tradition, will always be the centre of our fond memories.*

*We leave this campus with the assurance that the University will continue to play a large and prominent part in the activities of the community. May the men and women who pass through her doors always be worthy of the high ideals of this noble institution.*

*Tom Wood,  
President of the SRC*
