PROGRESS. SATURDAY, JULY 6, 1901

SOME ASPECTS OF REART DISEASE. Auge , Haste, All Excess Ferbidden to This Man-The Drend of Death.

A lawyer was talking with a friend when a sudden pallor came over his face. Thrusting his hand quickly into a waistcoat pocket he draw out a small phial from which he poured two or three pellets into the palm of his hand and swallowed them. He was a stout, robust man, having every appearance of health. His friend ex-claimed :

"Why, Jack, What's the matter ? What are you taking those pills for ?' Jack smiled grimly.

'There is something the matter with my heart,' he replied. 'Now and then the machine gets out of order. Some of the wheels don't work, or a cog slips. If, at those periods, I can get those little pellets of strychnine down quick enough, the difficulty is fixed up for the time being. But one of these days the poison will get in its work too late and then --- "

The elipsis was supplied by a look more eloquent than words.

What is the nature of your heart affec. tion ? Have you been examined ?'

'Yes, I presume that in twenty five years I have been examined by fifty physicians. But no two of them ever agreed as to the exact nature of my disease.

What are your symptoms ?

.The first and most prominent sympton is the fact that I am constantly made aware that I have a heart. Either it is beating so slowly that I can scarcely feel it or else it is racing like a corliss engine at full speed. At night I can hear it creak is true.' ing and straining like an old schooner. off Point Judith in a storm. I have often smiled to myself in the dark hours just before dawn when I have been awakened by some frightful struggle on the part of my One cause I can give you is physical and heart to keep up its natural rhythm, to think how some strong man, a baseball player or an athlete, who never knew he had a heart, would act it such an attack I may as well add that they are learning came upon him suddenly.'

'Oh, it is only a case of dyspepsia,' seid his triend. 'I often have green feelings around the heart myself.' 'Yes, that's what all your friends tell

you,' said the lawyer, 'they want to cheer you up. It's a good thing that they do. Heart disease is naturally depressing. Consumptives always believe they are go ing to get well, but a man whose heart is affected is positive that he won't live a week.' 'I suppose the condition of your heart

prevents you from run ing?' 'Yes, and any form of severe physical

exercise. I wouldn't run a block for \$50,000 I am never in a hurry to catch a Car.

What effect does heart trouble have upon the mind ?' Well, I suppose that depends upon the

man, If he be of the highly imaginative type the consciousness that his heart is diseased is always depressing. There are times when he is perfectly quiet, or when the heart is gently stimulated by poisons such as strychnine or alcohol, that he is comparatively free from distressing symptoms. But the knowledge that his heart is

weak never wholly leaves him. It follows him everywhere. He dare not drink because he is atraid of over-stimulation and

some inscrutable manner, which the wisest of doctors can give no rational explanation culous in a photograph. of it has stopped beating for the fraction of a second. But in that brief space of time

all the organs of the body have been notified that something is the matter with the engine. 'You stand hesitating on the brink of an-

other existence of annihilation, listening to see if the engine will resume its old time heat. Then is the time that your clammy fingers reach for your waistcoat pocket. In your baste you take a double dose. Slowly the noble organ responds to the stimulus and you are saved for the

'I believe that I make no exaggeration in the statement that I have really to all intends and purposes, died a thousand deaths. But such is the wonderful elasticity of the mind, so buoyant is hope, that after the most severe of these attacks it leaves no lasting impression. But I natur-ally try to get the little bottle out quick.

Women Growing More Graceful.

'French women, as a rule, are mor graceful than American women,' said a woman photographer, who, during the last fifteen years, has photographed almost ev-

cores of actresses

ery woman in New York society as well as lections of photographs of professionals.' 'But American women are growing in

gracefulness every year,' she added. 'The photographer has a better chance than any one else has to find that out. And yet anybody who can compare a dozen fulllength photographs made twenty years ago with those made today will see that it

'How do you account for the growth grace.'

"Oh.' with a wise nod of the head, "there are two or three things at the bottom of itanother and perhaps equally potent one is mental. The physical cause is that women are learning to walk and stand properly. to sit properly, too.

'Now, there's a queer thing. What is considered sitting properly nowadays would have been called improper in our grandmother's time. Women sat primly upright on straight chairs, scarcely daring to cross their feet. How could you expect good lines and grace in a society trained to such stiffness ? With freedom has come ease and lack of self consciousness.

'As for standing properly, I can mak half a dozen standing pictures now where formerly I would not have found more than one or two good subjects. The young girls tresh from boarding school have poise and a carriage which people used to associate with the divine rights of queens. The older women are training themselves in the same lines. They can't get as pertect results, but they do wonders. I had one woman of perhaps sixty of whom I was making a full length picture and I asked her to try not to settle back, from the waist upward, as so many stout elderly women are inclined to do. She tried it, to correct it, but gave too much the impression of leaning forward. Finally she

said : 'Well I can't do it by moving my body backward and forward, but I can do it by breathing.'

'She did it, too. Think of a woman of Internal Treatment.

and nine times out of ten, would be ridi-'I made many pictures of Bernhardt this

winter. She poses admirably. She is so elender and graceful and will follow one pose 'h another as easily and naturally as most people would simply move the hand. When I say, 'There-stop ! that's what I want !' she's like a statue, but a liv-

ing one. I said to her one time : 'Ah, Mme. Bernhardt, you are simply yourself on the stage. That is why you re so wonderful

'Not at all ?' she said. 'I am never 'myself,' I am always acting off the stage well as on.

'Coquelin is a splendid sitter, Maude Adams is difficult, Julia Marlowe poses tairly well. Henrietta Crosman proved to be a good subject. But Bernhardt. with the personality of a woman of 30, in spite of her 50 plus, and the figure of a woman of 25. suspasses most of them in ease and grace.'

"Whose pictures have been selling best

this winter ? 'Oh, Calve, Duse and Bernhardt, I think. People are pretty loyal to Calve and Duse. Men's pictures don't sell very well. I think most of the buyers are women, but a good many men make col

What do you think of American photo graphy compared with that abrcad?'

'I think it is crude. American photo graphy seem to be on the lookout for sen sational roses. something striking. Now you take Reutlingea in Paris. If you wanted just head and shoulders I think there are a hundred photographers in New York

who could do as well as if not better than he. But in full length photographs of wo men be looks after the lines and he general

ly gets very beautitul and graceful ones. Still he has faults which the best American photographers do not bave, so the balance of credit isn't all on that side of the ocean

Subscribes For 58 Newspapers

Prof. W. H. Lynch of Mountain Grove Academy at Mountain Grove, Mo., is cred ited with reading more paid-for newspapers than a ny other man in the United States. He subscribes for fifty eight newspapers, six of them dailies. The professor was in Kansas City yesterday, and in discussing newspapers, said :

'I use the newspapers in my classes. They are the best instrument in the world for teaching current history and geography The real drama of life in its varied forms of commercial, political squares and social relations must be seen and learned through 'the mirror of the world,' the newspaper. Every Evider morning in the academy is devoted

Burning Scalv

Complete External and THE SET, consisting of CUTICURA SOAP, to cleanse the skin of crusts and scales, and soften the thickened cuticle, CUTICURA OINTMENT, to instantly allay itching, irritation, and inflammation, and soothe and heal, and CUTICURA RESOLVENT, to cool and cleanse the blood, and expel humour germs. A SINGLE SET is often sufficient to cure the most torturing, disfiguring skin, scalp, and blood humours, rashes, itchings, and irritations, with loss of hair, when the best physicians, and all other remedies fail.

COMFORT FOR POOR SLEEPERS

The Mystery of Sleep-Insomnia a Warning of Overwork or Aproaching Nervous Collapse Which is Not to be Lightly Disregarded,

Robbery of Sleep One of the Worst of Crimes-Dr. Chase's Nerve Foot by building up Blood and Nerves Restores Restful Sleep.

"Sleep is the vacation of the soul; it is the mind gone into the playground of dreams; it is the relaxation of muscles, and the solace of the nerves; it is the calming of the pulse; it is a breathing, much deeper; it is a temporary oblivion of all carking cares: it is a doctor recognized by all schools of medicine. Lack of sleep puts patients on the rack of torture, or in the mad-house, or in the grave."

Insomnis is a disease of our country and of our age. Where there is one man or woman with strong, healthy nerves, there are a dozen whose nervous systems are overwrought and unstrung. In vain they toss in beds of misery, longing for nature's great restorer, restful sleep. In hou s of temptation they resort to opiates and narcotics, which produce temporary unconsciousness at an enormous expense to the human system. In all occupations and professions there are times when a special draft is made upon nervous energy. Mothers, too, deprived of sleep and worn out by caring for their children and watching them through periods of sickness and disease, are left physical wrecks. Especially in the springtime do we all seem to require an unusual allowance of sleep to overcome the weakening and debilitating effects of winter and the trying changes of temperature.

Sleeplessness is a warning that the nervous force in the body is being exhausted more rapidly than it is being created, and points to ultimate physical bankruptcy. The

nights do not repair the weste of the day. Some unusual effort must be made to overcome this state of affairs, or collapse is certain. Scientists have pointed out certain elements of nature as being peculiarly suited to the needs of an exhausted nervous system. Through the medium of the blood and nervous system these restoratives carry new life and vital energy to every nerve cell in the human anatomy.

While these elements of nature are combined in various proportions, it is now generally conceded by physicians that the prescription used by Dr. Chase with such marvellous success in his immense practice is the one which gives most general satisfaction. This preparation is now known as Dr. Chase's Nerve Food, and has come to have an enormous sale in ever part of this continent, where nervous disorders and sleeplessness are so prevalent.

Each and every sufferer from nervous and physical exhaustion, thin, watery and impure blood, and the demon insomnia. can begin the use of Dr. Chase's Nerve Food with positive assurance that the regular use of this famous food cure will gradually and thoroughly build up and reconstruct the nerve cells and bodily tissues, and permanenty cure sleeplessness and irritability.

You must not confuse Dr. Chase's Nerve Food with sleep-producing drugs and opiaes. It is different from any medicine you ever used, and instead of tearing down the tissues and deadening the nerves, it cures by filling every cel 1 with new life, vigor and ritality. As a spring tonic and invigorator it is marvellous in its action, instilling into weak, worn, tired human bodies the strength, elasticity and buoyancy of perfect health ; 50 cents a box. 6 boxes tor \$2 50, at all dealers, or sent, postpaid. on receipt of price, by Edmonson, Bates & Co , Toronto.

A NEW SWINDLE.

Peddlers Offering Spurious Pills Repre-sonting Them to be the Same as Dr. Williams' Pilk Pills-A Reward for Ruch Evidence as Will Lead to Conviction.

happened once again over the question of The latest device for swindling the pub-The latest device for swindling the pub-lic is now being operated in various parts of the Maritime Provinces, where a couple of peddlers are going from door to door selling a pink colored pill which they re-present to be the same as Dr. Williams' Pink Pills for Pale People. It is needless to say that this claim constitutes a swindle as Dr. Williams' Pink Pills are made from a court formule hower only to the pro-In the late Committee on the Civil List I moved for a reduction in the preposterous number of these functionaries. I did so no: solely in the interests of economy, but also a secret formula known only to the pro-prietors. We strongly advise readers of PROGRESS not to be duped by peddlers of PROGRESS not to be duped by pedders of this class, no matter what representations they may make, and also to remember that medicines of such sterling reputation Dr. William' Pink Fills are never hawk-ed from door to door by peddlers, are himself has now taken my view of the matter, and reduced his thirty-six chaplains to twelve. Such however, is my confidence never sold in any form excpt in the Com-pany's boxes, wrapped around which will be found directions for use, the whole in him that I believe the king might reduce his staff of spiritual advisers by another 75 his staff of spiritual advisers by another 75 per cent., without incurring any risk either mame "Dr. Williams' Pink Pills n this world or the next. because it appeared to me that to assume

that thirty-six chaplains were necessary to the King's spiritual welfare was the reverse of flattering to bis Majesty, for it implies that he is spiritually in a very parlous plight. The committee would not listen to any proposal for reduction; but the king

Friday morning in the academy is devoted to the reading of newspapers.'

consequent paip tobacco, because the weed has a depressing influence upon his life pump. He dares not permit his temper to get the better of his judgment. The heart is peculiarly susceptible to anger. Should a man grossly insult him he must grin and bear it. for both the passion of resentment and the physical effort required to place a blow would result in more injury to the man himself than to his enemy.' I can see from your remarks that heart

disease has some moral advantages.' 'Yes, it certainly is a deterrent so far as

alcohol, tobacco and anger are concerned. In fact a beart physically bad is opposed to vice of any kind. It kicks up a row even if a man tries to do a little loving.' 'Is there any pain ?'

'Not in the sense that the word is gener-ally understood. If your finger is caught in a door crack there is a vivid sense of suffering, but no tear. With heart trouble there is no acute pain, but plenty of uneasiness and an awful sense of weakness. Anguish is the better word to describe it.

'I have been walking along a street, feeling in my normal condition, when a chasm has opened in the sidewalk a thousand feet deep and I have stood on the brink trembling and sweating with apprehension. A feeling of such awful weak-ness and apprehension has come over me that I have been paralyzed, speechless. There was absolutely no physical indication that anything had happened, but the mental appreciation was frightfully appal-

At such times my heart had telegraphed to my brain that it was tired. It had been pumping away in my breast ever since I was born never stopping. And now, in

her age fighting the she had at least partly effaced their results. But that is like the American woman.

'The other thing which helps to make her more graceful is her increased savoir taire. You rarely see provincial women who are thorougly graceful. Sometimes they have natural grace, but even natural grace can be effectually thrown out of gear by self-consciousness. Photographers have two kinds of selt consciousness to deal with. There is the self-consciousness of conceit or assurance, and the self-consciousness of timidity and embarrassment. It is hard to tell which is worse, but I almost think the former is. With timid or embarrassed sitters you have only to get them interested. Then they become natural.'

'It is hard to make satisfactory photographs of old people ? Old ladies, that is, Men are not supposed to have any vanity. 'Vanity !' exclaimed the photographer. They have more than the women have. But we're not talking of them now. At to old ladies, I don't think they are hard to please. Ol course, the great cry always is: 'Don't let me look stout !' -which is a difficult command to carry out, as most American women having a dire habit of taking on flesh with years.'

Are professional people easier subjects than women in society ?'

'No. Of course, they are in the habit of posing and have a certain facility about it which would make the work easy for photographer who was satisfied with almost any old pose. But the subject with them as a general thing is that they are too theatrical. They want to be taken in some extraordinary attitude; generally in the one which marks the climax of a play

Millions of People Use Cuticura Soap

Assisted by CUTICURA OINTMENT, the great sk cure, for preserving, purifying, and beautifyin the skin, for cleansing the scalp of crust, scale cure, for preserving, purifying, and beautifying the skin, for cleansing the scalp of crust, scales, and dardruf, and the stopping of failing hair, for softening, whitening, and soothing red, rough, and sore hands, for baby rashes, itchings, and chafings, and for all the purposes of the toilet, bath, and nursery. Millions of Women use Cu-TICURA SOAP in the form of baths for annoying irritations, inflammations, and exoriations, or too free or offensive perspiration, in the form of washes for ulcerative weaknesses, and for many senative, antiseptic purposes which readily sug-gfst themselves to women, and especially moth-ers. No amount of persuasion can induce those who have once used it to use any other, espe-cially for preserving and purifying the skin, scalp, and hair of infants and children. No other medi-cated soap is to be compared with it for preserv-ing, purifying, and beautifying the skin, scalp, hair, and hands. No other foreign or domestio totiet soap, however expensive, is to be com-pared with it for all the purposes of the toilet, bath, and nursery. Thus it combines in OKE SOAF AUXE PHICK, the BERT skin and complex-ion soap, and the BERT toilet and baby soap in the world. tifying

A Point of Honor.

A story told of Dr. Paget, the new bishop of Oxford, Eng., illustrates the high sense of honor with which he was animated when dean at the university. A very serious riot had occurred, and the rooms of an undergraduate had been simply wreckan undergraduate had been simply wreck-ed. Furniture had been destroyed, pictures smashed, windows broken, and the bed and bedding thrown out into the qu d. The next morning the victim was sun. oned to the dean. "I believe, Mr.—your recoms were last night entered and consid-able damage one," said Dr. Paget. Do you know the names of those who were guilty of this outrage?" 'Yes, sir, I do." 'Please, then, to give me their names., 'I am afraid I cannot.,. The head of the college looked up severely. 'I must insist college looked up severily. 'I must manned on the names; otherwise, I shall have to consider your refusal as very serious mat-ter.'' 'I can't give the names, sir, I really cannot,'' said the young undergrad-firmly. And the story goes that the dean thereupon rose, and, holding out his hand kindly, shook his pupil's hand, saying. 'I was sure you would not give the names. I am glad you refuse. I think you do right to refuse.,,
