## Own Your Own Telephone

To know the con-  
ditions under which  
your neighbors are  
working, to be in  
touch with markets  
where you sell your  
produce, to get  
weather reports in  
time to protect  
your crops, means  
more time to de-  
voted to making  
your farm produc-  
tive.

Write for a free copy of our interesting bulletin  
"A Telephone on the Farm"

It contains valuable information about  
building your own telephone system.

little. We make hand, windmill, gasoline and  
electric outfits.

EMPIRE MFG. CO., LIMITED  
1200 Dundas Street, London, Ontario

## BARN FOR SALE

One 64 x 45; another 64 x 45. The latter could  
go in sections.  
McALISTER ESTATE  
9 Rose St., Galt Phone 788L

The name "Simonds Crescent Ground" on a cross-cut saw, means  
that the saw will cut 10% more timber same time as labor being  
consumed, than any other brand of saw made to date—this we  
guarantee.

This is a broad statement but one which we stand behind.  
No saw has yet been returned owing to its having failed to  
fulfill the above guarantee.

The advantage of the Crescent Grinding, in Simonds Cross Cut  
Saws, is that it prevents binding in the kerf and enables the operator to  
push as well as pull the saw—points experienced sawyers appreciate.

Always buy a saw with a sharp cutting edge—not a soft saw—  
because the former lasts longer and keeps its edge better.

## Facts To Know When Buying Cross-Cut Saws

Simonds Steel is the only steel which we are sure will take a  
temper to hold a cutting edge longer than the ordinary saw.

The illustration shows a Simonds Cross-Cut Saw, No. 325, with a  
hollow back instead of a straight back.

When you buy a saw, it will pay you to get a Manufacturer's  
Brand Saw, with the name "Simonds" on the blade, at about the  
same price as you will pay for a low grade Special Saw.

Ask your dealer for the Simonds Cross-Cut Saw and write  
direct to the factory for further particulars.

Vancouver, B. C. MONTREAL, QUE. St. John, N. B.

If there's one thing more  
than another that's  
a necessity to the  
housewife,  
it's a good  
range!

## McClary's Kootenay Range

There's a good reason for our using "Armco" rust-resisting iron for its body, and  
Semi-Steel for the firebox linings; a good reason for its burnished smooth top, its  
nickel-plated steel washable oven, its double duplex grates, patented detachable reser-  
voir, its scientifically planned firebox and flue system.

These and other patented features of the "Kootenay" are fully described and  
pictured in the dainty recipe booklet. Do not hesitate to write for this booklet.

By doing so you can study and know every detail of the Range before personally  
examining it at your merchant's store.

You will then be able to more intelli-  
gently discuss the range and understand  
its many good points.

The booklet is free. Write to-day.
