Young? Yes-the oldest Ford is just ten years young—this month. And its youngest brother is the choice of the lot—a better car than those we built not long ago and sold at nearly twice its price. Big production makes the Ford price low.

More than 275,000 Fords now in service -convincing evidence of their wonderful —convincing evidence of their wonderful merit. Runabout, \$675; Touring Car, \$750; Town Car, \$1,000—f.o.b. Walker-ville with all equipment. Get interesting "Ford Times"—from Dept. G., Walker-ville factory. Ford Motor Company of Canada, Livindad Canada, Limited.

Koday the test is much broader: "Will it protect from storms and sparks and burning embers?" Shingle roofs are now prohibited in many cities by law, on account of their inflammability.

NEPONBET Paroid Roofing will do all that the best shingles ever did, and in addition is a protection against fire, won't rust, and can't blow off.

This is the positive protection NEPONSET Paroid Roofing has given for Government engineers, architects and property owners specify NEPONSET Paroid solely on the strength of proved past performances— not on future claims. NEPONSET Paroid costs but a trifle more—lasts years longer. It is made in Canada.

LEGISLATION FOR AGRICULTURE AT OTTAWA

of agriculture were enacted during the past session of Parliament. Of these the Agricultural Aid Act stands out most prominently. Western grain growers are to receive relief from the growers are to receive relief from the alterations to the Grain Act while all classes of the business community should be helped by the new state of the Bank Act. By a meagre revision of the tariff a few necessary articles should be purchased more cheaply. Parliament made little or no objection to granting considerably increased appropriations for carrying on the work of the various branches of the Department of Agriculture.

APPROPRIATIONS The following table gives the amounts of money voted to carry on the work of the various branches of the Department of Agriculture for the present and the past fiscal years:

Civil Government Experimental Farms	1913-14. 8 406,525 630,000	1912-1 \$ 445,40 395.00
Dairying, Fruit and Co'd		
Storage Improvement of Farm	433,000	368,50
Seeda	115,000	80,00
Live Stock	200,000	102,00
Meat Inspection	710,000	525,00
Tobacco	30,000 433,000	233,00
To administer Insect and		
Pest Act Publications and Int.	30,000	25,00
Institute	32,000	15,00
To administer Agr. In- struction Act	25,000	
The same of the sa		

quired to pay the salaries of servants within the Department of Agriculture. This does not include inspectors and other employees who live away from Ottawa. The decrease from last year is due to the transfer of the Census and Statistics and Archives branches to other Departments.

In response to a popular demand the Experimental Farms system is be-ing rapidly expanded. Of the \$630,000 voted for this work \$350,000 is to be used in establishing and maintaining additional branch farms and stations. Of these there are in course of ganization stations situated at the following points: Charlottetown,
P. E. I.; Fredericton, N.B.; Kentville,
N.S.; Ste Anne de la Pocatiere, Que.; Scott. Sask.; Kamloops, Invand Sydney, B.C.
COW TESTING EXTENSION Kamloops, Invermere,

In the Dairy and Cold Storage
Branch the work is being expanded in
all directions. Cow testing especially
is being increased through the medium of dairy centres, of which there are about 20 in operation. During the year centres are to be opened in the

Maritime Provinces and in the West.

An effort is being made to keep up with the expansion of the dairy and fruit production in the providing of cool transportation. The government guarantees a certain amount of space on six ocean steamers that carry der fruit and other readily perishable products. Last year nearly 9,000 cases of peaches were thus taken care of and an expansion is provided for this year.

In connection with the iced service 10,000,000 lbs. of butter were to western points last shipped mer. This service is continued from about the middle of May till the middle of October. The cars are run middle of October. The cars are run weekly or fortnightly according to the requirements of the route on an advertised schedule so that shippers can deliver their butter to the stations can deliver their outer to the stations at the proper time. A shipper may forward any quantity from one pack-age upwards and pay only the regular less than carload rate without extra charge for icing.

FRUIT DIVISION EXPENDITURE To administer the Fruit Division requires about \$70,000. During the uires about \$70,000. During the ession the Fruit Marks Act was

MPORTANT measures for the cause amended to place foreign fruit on the same basis as home grown in so far as inspection is concerned. The eight thousand dollars are set eight thousand dollars are set a art for experiments in cooling fruit befor shipment, while \$200,000 is set aside to bonus cold storage ware houses. Of those receiving grants 20 are in operation and two are being

commenced.

Of the \$115,000 needed by the Seed
Branch some \$35,000 will be required
for subventions to the different provinces. This is at the rate of \$1,000 for every million acres under crop. The useful work of the Canadian Society The useful work of the Canadian Seed Growers' Association is curried on at the expense of the vote to this branch. In addition to the administration of the Seed Control Act the Seed Com-missioner tests at Ottawa and at Calgary large numbers of seed samples

FURE-BRID MALES FOR ALL

As has already been quite generally
announced, the new Life Sect Commissioner has evolved as facein the more than the section of the
interpretation of the country. Much of the additional
vote for this year will be required to
purchase pure-bred stallions, bulla,
boars and rams to be placed at the disboard of farmers through associations
formed for the purpose. Only district
that are without pure-bred males will
have the benefit of this service. The
animals are to remain the property of nave the beneat of this service. The animals are to remain the property of the Department and will probably be moved from place to place as circum-stances seem to warrant. All the stances seem to warrant. All the work previously carried on such as the Record of Performance will be further eveloped Animal Contageous Diseases

Act was amended to increase the com-pensation for destroyed horses suffering from glanders. The standard maximum valuation was increased from \$150 to \$200 for grade animals, and from \$300 to \$500 for pure-breds. For purposes of compensation the rates for other steck are for cattle \$60, and for hogs and sheep \$15 each for grades, and \$150 and \$50 respectively for pure-bred animals. Under the Act pure-bred animals. Under the Act the compensation is to be two thirds of the value of the slaughtered animal. Two hundred thousand dollars of the Health of Animals vote is for the meat and canned food inspection service which is constantly expanding.

Tobacco experiment stations are in-

vestigating and demonstrating tobacco

vestigating and demonstrating tobacco growing and curing at Harrow. On-tario, and at Farnham and St. Jac-ques l'Achigan, Quebec. Besides the \$50,000, which will give to Brandon Fair this year the title of Dominion Exhibition, the Department is spending a good deal on an exhibit (Continued on page 9)

Ashamed of His Seed

(Concluded from page 4) farmers sow per acre: In cats 134 bushels to four bushels an barley from 134 bushels to 23/4 from

I have only found four farmers who treated their seed for smut this year out of 100 or more visited. Fully 75 per cent of the farmers are content with putting the seed grain only once through the fanning mill and the chief object then is to blow out the chaff and straw so that it will go through the seeder. Too little atten-tion is paid to screening out the weed

In Prince Edward county got quite a number of samples of bar-ley in one township, I found that 90 per cent. or more of the farmers had got their seed barley either directly or indirectly from one farmer in an other township who had O. A. C. No. 21. The barley samples obtained there were generally pure and well cleaned.
